Art Practice As Research Inquiry In Visual Arts:

Art Practice as Research Graeme Sullivan, 2010 *Art Practice as Research* Second Edition continues to present a compelling argument that the creative and cultural inquiry undertaken by artists is a form of research. The text explores themes, practices, and contexts of artistic inquiry and positions them within the discourse of research. Sullivan argues that legitimate research goals can be achieved by choosing different methods than those offered by the social sciences. The common denominator in both approaches is the attention given to rigor and systematic inquiry. Artists emphasize the role of the imaginative intellect in creating, criticizing, and constructing knowledge that is not only new but also has the capacity to transform human understanding.

Art Practice as Research Graeme Sullivan, 2005. This book will publish in a new edition on December 1, 2009. We are no longer supplying instructors with complimentary review copies of this edition. In this rich and layered reflection on visual arts practice as research, Graeme Sullivan launches a passionate and convincing case that rewrites the definitions of art and research as it unapologetically claims for the visual arts the respect and admiration of the academy.

Jessica Hoffman Davis, Harvard University.

The book is divided into three content areas that provide a unique framework for carrying out inquiry in the visual arts.

Contexts for Visual Arts Research is a historical review that positions the visual arts as a culturally grounded and institutionally bound area of artistic and educational inquiry. *Theorizing Visual Arts Practice* presents the thesis that visual arts practice is a theoretically robust area of inquiry and a transformative approach to creating and critiquing knowledge. *Visual Arts Research Practices* describes a range of strategies and approaches to planning and carrying out visual arts research.

This will also be an invaluable reference for anyone with an interest in interdisciplinary research in the social sciences and the role of imaginative inquiry in human understanding.

A blog by Graeme Sullivan welcoming contributors interested in discussing ideas and sharing information about art as a form of research. Praise for this text: Sullivan challenges our assumptions about what constitutes research practices and in doing so presents a ground-breaking analysis for visual arts practice as research.

Art, Research, Philosophy Clive Cazeaux, 2017-04-11 Art Research Philosophy explores the emergent field of artistic research art produced as a contribution to knowledge As a new subject it raises several questions What is art as research Don't the requirements of research amount to an imposition on the artistic process that dilutes the power of art How can something subjective become objective What is the relationship between art and writing Doesn't description always miss the particularity of the artwork This is the first book length study to show how ideas in philosophy can be applied to artistic research to answer its questions and to make proposals for its future Clive Cazeaux argues that artistic research is an exciting development in the historical debate between aesthetics and the theory of knowledge The book draws upon Kant phenomenology and critical theory to show how the immediacies of art and experience are enmeshed in the structures that create knowledge The power of art to act on these structures is illustrated through a series of studies that look closely at a number of contemporary artworks This book will be ideal for postgraduate students and scholars of the visual and creative arts aesthetics and art theory The Open Access version of this book available at www.taylorandfrancis.com has been made available under a Creative Commons Attribution NonCommercial No Derivatives 4.0 license <https://www.taylorfrancis.com/books/9781315764610>

Art Practice in a Digital Culture Hazel Gardiner, Charlie Gere, 2016-04-15 Much as art history is in the process of being transformed by new information communication technologies often in ways that are either disavowed or resisted art practice is also being changed by those same technologies One of the most obvious symptoms of this change is the increasing numbers of artists working in universities and having their work facilitated and supported by the funding and infrastructural resources that such institutions offer This new paradigm of art as research is likely to have a profound effect on how we understand the role of the artist and of art practice in society In this unique book artists art historians art theorists and curators of new media reflect on the idea of art as research and how it has changed practice Intrinsic to the volume is an investigation of the advances in creative practice made possible via artists engaging directly with technology or via collaborative partnerships between practitioners and technological experts ranging through a broad spectrum of advanced methods from robotics through rapid prototyping to the biological sciences
