solution to the Indian problem at the end of the nineteenth century emphasized education and assimilation. Educational theories at the time viewed art as the foundation of morality and as a way to promote virtues and personal improvement. These theories made the subject of art a natural tool for policy makers and educators to use in achieving their assimilationist goals of turning student savages into civilized men and women. Despite such educational regimes for students, however, indigenous ideas about art oftentimes emerged from below, particularly from well-known art teachers such as Arizona Swayney and Angel DeCora. Colonized through Art explores how American Indian schools taught children to abandon their cultural heritage and produce artificially native crafts that were exhibited at local and international fairs. The purchase of these crafts by the general public turned students' work into commodities and schools into factories.
