materials for any job. This powerful visual resource combines hundreds of illustrations from Architectural Graphic Standards with corresponding building material performance and specification information from AIA's MASTERSPEC published by ARCOM. Use this book during the schematic and design development phases of a project and as an indispensable aid for product selection and specification. Essential for architects, interior designers, and building designers, this vital reference provides information to make informed decisions about specific design goals such as affordability, environmental friendliness, durability, fire resistance, and esthetic success. Features include: Unique source of independent in-depth building product performance information; the one source that gives you reliable building product information before you consult with manufacturers; Covers a full range of standard finish materials and includes selection criteria, details, typical product sizes, and installation and maintenance data; Provides current standards based on research by government association and independent testing organizations as well as the input of experienced architects and specifiers. Architectural Graphic Standards has served the design community for decades as a virtual bible for architectural detailing. Practice Management for Design Professionals John Philip Bachner, 1991-09-03 In the mid 1960s geotechnical engineers paid the highest liability insurance of any profession and by 1969 were virtually uninsurable. As a result, the ASFE was founded and helped these engineers not only lower their insurance rates but get to the point where by 1980 they were the least liability-prone members of the design profession. Now John Bachner and the ASFE tell all other design professionals how to accomplish the same task. This book, which incorporates the ASFE's Introduction to Professional Practice program for advancing architects and engineers' knowledge of professional practice issues, addresses almost every aspect of the design professionals' practice as they relate to liability, from procedures for verifying the accuracy of technical output to steps for improving client and project selection, worksite development, personnel training, and dispute resolution.
