imagery to help individuals awaken to higher consciousness and tap talents hidden within By opening the inner frontier one will also utilize the power of visualization to improve physical and emotional health This book explores the Light and Dark side of the personality allowing acknowledgment and acceptance equally This enables the sightful one to exist wholly in Divine Energy without encumbrances of the past It is not easy but anything worth while seldom is Like brushing teeth the more it is done the less thought is involved The Light category which contains God Love and Truth is the basis for feeling It is Dark duality contains the opposite which reflects Satan Hate and Deceit and is the basis for emotion Without motion matter does not exist Motion or emotion is a vital ingredient to obtain its link with feeling The two constantly move within themselves and are the expression of Divine Energy desiring to experience Itself

Meditations for Healing Larry Moen, 2011-05-01

To be healed implies physical and mental strength and freedom from disease The disease we encumber in our own being is a result of past programming It has been my experience that this past programming can be purified through the process of guided meditation For that reason I have assembled this collection of healing meditations from a varied group of guides including psychologists therapists physicians and others who offer imagery techniques as part of their lives or careers Each imagery can be perceived as a prayer You are simply asking for and receiving what your unlimited higher self has to offer Images can produce powerful emotions and unlock psychological blocks As you turn inward you may find light truth and love which may be different from your normal conscious state You may also discover darkness deceit and fear which in this world of duality is only a mask covering the higher states of consciousness Love is a powerful healer that can be revealed or enhanced through meditation Creating a loving atmosphere is beneficial to those who are physically ill Imagery can also help the body boost its immune system increase the production of chemicals that encourage healing and generally relax and promote the peace and love an individual needs to aid in the healing process Allowing yourself to love yourself has surprising consequences It helps you become free break down psychological walls be fearless and be strong It is only after you love yourself that you can begin to heal Visualization has also been found to enhance learning build self confidence and improve athletic ability It is not magic and it is not supernatural Guided imagery is a simple matter of relaxing uncluttering your mind and focusing your thoughts clearly on what you wish to accomplish It helps create a more receptive environment to help you achieve your desired results During my many years of practicing meditation and unlocking the secrets of my own psyche I have found that what we concentrate on we receive If a person concentrates on not getting negative results negative results still occur because the focus is on the negative On the other hand by focusing on the positive one will move in that direction receiving positive results This book is filled with positive Another important healing benefit of meditation is the release of stress When stress is not released it can be internalized and cause psychological and physical damage Guided meditation is one of the many tools available for teaching people how to let go of tension anger fear anxiety and other stress producing emotions that cause illness This book will help you change and improve your life by guiding you to your own inner

strength Such strength is innate in each one of us and while many people rely on outside influences persons or materials to achieve changes and growth all the tools you need are present within you Guided imagery helps you see yourself the way you wish to be As you practice visualization you become more and more comfortable with a new reality for yourself For example if you are hesitant about speaking in front of an audience you can visualize successful speeches and see yourself in front of an audience in a calm controlled manner Of course you still must actually practice speaking in addition to the imagery But the imagery will enhance your progress and success These meditations are given to you with sincere love and hope that they will help enhance your personal abilities and mental powers Allow yourself to let go and enjoy these experiences You are all the things you want to be Guided imagery will help you discover that
