Asian Financial Crisis 1997 Explained:

Lessons from the Asian Financial Crisis Richard Carney, 2009-01-13 The contributors provide an overview of developments in the affected countries during the 1997 Asian financial crisis lessons learned and corrective measures taken lessons learned by regional and international actors how domestic regional and international politics have affected the outcomes the identification of potential future problems and levels of preparedness

Explaining ASEAN Shaun Narine, 2002 Is ASEAN the foundation of a strong regional community in Southeast Asia Or is it no more than an instrument used by its members to advance their individual interests Addressing these questions Shaun Narine offers a comprehensive political analysis of ASEAN from its creation in 1967 through the events of 2001 Reflecting both the accomplishments and the limitations of the organization Explaining ASEAN explores issues of regional security economic stability and the growing expectations of the international community Narine's trenchant analysis makes it clear that unless ASEAN can resolve the problems of inadequate resources and disagreements among the member states its future as an effective active international regime is doubtful

Asian Financial crises International Monetary Fund, 2001-01-16 This paper analyzes the origins implications and solutions for the Asian financial crisis From the perspective of a member of the Executive Board of the IMF as Asian problems were building the IMF overlooked weaknesses in bank and corporate balance sheets in much of Asia the IMF was unaware of the extraordinary leverage of Korean companies which in some cases reached a ratio of 600:1 debt to equity The IMF did not focus on the weak accounting and disclosure practices of banks and nonbanks or generous rollovers of banks to their key clients

The Asian Financial Crisis Wing Thye Woo, Jeffrey Sachs, Klaus Schwab, 2000 This book analyzes the Asian financial crisis of 1997-1999 In addition to the issues of financial system restructuring export led recovery crony capitalism and competitiveness in Asian manufacturing it examines six key Asian economies China Indonesia Japan Korea Malaysia and Thailand The book makes clear that there is little particularly Asian about the Asian financial crisis The generic character of the crisis became clear during 1998 when it reached Russia South Africa and Brazil The spread of the crisis reflects the rapid arrival of global capitalism in a world economy not used to the integration of the advanced and developing countries The book makes recommendations for reform including the formation of regional monetary bodies the establishment of an international bankruptcy system the democratization of international organizations the infusion of public money to revive the financial and corporate sectors in Pacific Asia and stronger supervision over financial institutions The book emphasizes a mismatch in Pacific Asia between investment in physical hardware e.g. factories and machinery and in social software e.g. scientific research centers and administrative and judiciary systems In a world of growing international competitiveness concerns over governance will weigh increasingly heavily on unreformed Asian countries The long term competitiveness of Asia rests on its getting its institutions right

The Asian Financial Crisis Klaus Veigel, 1999-05-18
Inhaltsangabe Abstract Macroeconomic stability and rapid export growth were the two key elements in starting the virtuous

circles of high rates of accumulation efficient allocation and strong productive growth that formed the basis for East Asia's success World Bank 1993 Public perception of the Asian economies could hardly have shifted more since that time Currency depreciation rising corporate bankruptcy bank failures and sovereign bonds downgraded to junk bond status ended the euphoria in Asian emerging markets Almost overnight the reputation of the Newly Industrialized Countries NICs in East and South East Asia deteriorated from a model of efficient development to an example of worst crony capitalism Politicians rating agencies and investors were caught off guard by the development of the Asian financial crisis During the meeting of the Asia Pacific Economic Cooperation forum APEC in November 1997 U S President Bill Clinton referred to the financial crisis in Asia as merely a few small glitches in the road Moody's and Standard and Poor's had upgraded the Philippines long term debt rating a few months earlier and downgraded the affected economies only when the crisis persisted for more than three months Comparing Thailand's situation to Mexico's economy prior to the peso crisis 1994 1995 the Morgan Stanley star analyst Barton Biggs wrote in January 1997 Thailand's problems are cyclical not secular Thailand is not Mexico in late 1994 On the numbers Thailand qualifies for the euro and is healthier than Germany The optimism seemed warranted by a history of high growth in the Asian countries Before the outbreak of the crisis Malaysia Indonesia Korea and Thailand had experienced uninterrupted growth of more than 5 percent of GDP per year for almost two decades The economic profession also experienced its Waterloo in Asia Economists not only failed to predict the crisis they also failed to recognize the vulnerability of the region Paul Krugman 1994 in his now famous article in Foreign Affairs was the only well known economist to doubt the sustainability of rapid growth in East and Southeast Asia Nevertheless even he did not predict this kind of collapse but rather a gradual economic slowdown of growth Despite the initial confusion among economists academic discussion about the Asian financial crisis quickly crystallized around two different explanations of the crisis One explanation
