

# Welder Qualification Standard ASME

## GENERAL

**QW.** In performance qualification, the basic criteria established for welder qualification is to determine the welder's ability to deposit sound weld metal. The purpose of the performance qualification test for the welding operator is to determine the welding operator's mechanical ability to operate the welding equipment.

## QUALIFICATION STANDARD

- **ASME SECTION IX**  
SECTION IX: This is the welding code referenced by American codes that deal with the design and manufacturing of pressurized equipment.

## QUALIFICATION PROCESS

- Welders must be qualified as per the rules of **Section IX** before they can weld on ASME code equipment.
- Welders are qualified through the testing of weld coupons.
- Weld coupons are produced in accordance with the requirements of a Weld Procedure Specification (WPS).
- A WPS is a standard operating procedure developed by the manufacturer that provides the welder with instructions for producing welds that will meet all requirements.
- ASME Code Section IX defines specific "essential variables" for the weld processes (methods used to achieve the weld joint, for e.g. Gas Tungsten Arc Welding (GTAW), Plasma Arc Welding (PAW), etc.) allowed by the Code. The WPS must define these variables within the limits allowed.
