at Aspire Public Schools and she also closely collaborates with district and charter leaders from across the country on this work. Go Blended offers boots on the ground support for laying the foundation for a blended learning program in our schools and classrooms. Throughout the book, teachers with blended learning experience share helpful tips and lesson plans to help educators make purposeful choices in using technology to fulfill students' needs without becoming an end in itself. This useful guide also offers key documents and timelines to support a blended learning implementation and provides step-by-step practical advice for avoiding mistakes. Readers will gain expert insight into both the broad and narrow of blended transition from sweeping concepts like program goals to nitty-gritty details like teaching routines around technology use. Technology is rapidly changing the landscape of education; teacher effectiveness and student achievement are both tied to the ability to adapt to new technology, and blended learning has become a hot topic in schools across the nation. Go Blended helps school leaders and teachers take their first steps toward blended learning, putting them in a better position to continuously adapt as the world changes. You'll learn how to investigate leadership and staff readiness to go blended, learn how to evaluate and purchase the right educational software, keep the program's goals in mind throughout the development process, teach lessons that set students up for success when using classroom technology, tailor the program to the students, not the other way around. Aspire's impressive track record of high performance along with a growing body of evidence from blended schools across the nation testifies to the reality that incorporating technology into the classroom can improve student outcomes. But improved student outcomes will only occur when teachers and administrators intentionally tailor technology and curricula to meet their goals. With Go Blended, you can be confident that you're focused on the ultimate goal of blended learning: increasing student achievement. **Synergist**, 1971 [Living on the Spectrum](#) Elizabeth Fein, 2020-07-07

How youth on the autism spectrum negotiate the contested meanings of neurodiversity. Autism is a deeply contested condition. To some, it is a devastating invader harming children and isolating them. To others, it is an asset and a distinctive aspect of an individual's identity. How do young people on the spectrum make sense of this conflict in the context of their own developing identity? While most of the research on Asperger's and related autism conditions has been conducted with individuals or in settings in which people on the spectrum are in the minority, this book draws on two years of ethnographic work in communities that bring people with Asperger's and related conditions together. It can thus begin to explore a form of autistic culture through attending to how those on the spectrum make sense of their conditions through shared social practices. Elizabeth Fein brings her many years of experience in both clinical psychology and psychological anthropology to analyze the connection between neuropsychological difference and culture. She argues that current medical models, which espouse a limited definition, are ill-equipped to deal with the challenges of discussing autism-related conditions. Consequently,

youths on the autism spectrum reach beyond medicine for their stories of difference and disorder drawing instead on shared mythologies from popular culture and speculative fiction to conceptualize their experience of changing personhood In moving and persuasive prose *Living on the Spectrum* illustrates that young people use these stories to pioneer more inclusive understandings of what makes us who we are

Workers at War Joshua H. Howard, 2004 This book focuses on the lives struggles and contrasting perspectives of the 60 000 workers military administrators and technical staff employed in the largest most strategic industry of the Nationalist government the armaments industry based in the wartime capital Chongqing The author argues that China s arsenal workers participated in three interlocked conflicts between 1937 and 1953 a war of national liberation a civil war and a class war The work adds to the scholarship on the Chinese revolution which has previously focused primarily on rural China showing how workers alienation from the military officers directing the arsenals eroded the legitimacy of the Nationalist regime and how the Communists mobilized working class support in Chongqing Moreover in emphasizing the urban working class and nationalist components of the 1949 revolution the author demonstrates the multiple sources of workers identities and thus challenges previous studies that have exclusively stressed workers particularistic or regional identities
