Opera and Politics in Queen Anne's Britain, 1705-1714 Thomas McGeary, 2022 Explores the political meanings that Italian opera its composers agents and institutions had for audiences in eighteenth century Britain The reign of Queen Anne 1702 1714 was pivotal for both politics and opera in Britain In this study Thomas McGeary brings together a wide range of sources to show how the worlds of politics and opera were entwined The associations that Italian singing and singers acquired by the 1690s were used in partisan Whig Tory writings Rather than a foreign invasion McGeary shows how the introduction of Italian style opera was a native product that grew out of plans for a new theatre in the Haymarket A crucial event for opera was Handel s arrival in London in 1710 While the criticism of opera by Whig writers such as Richard Steele and Joseph Addison is well known McGeary uncovers how the early promotion and sponsorship of opera was in fact largely a Whig enterprise and cultural program Indeed major political figures mostly Whigs participated in the support and patronage of opera Opera and Politics in Queen Anne s Britain will be required reading for opera scholars and cultural and political historians of eighteenth century Britain as well those interested in the vibrant literature culture of the period nage of opera Opera and Politics in Queen Anne s Britain will be required reading for opera scholars and cultural and political historians of eighteenth century Britain as well those interested in the vibrant literature culture of the period nage of opera Opera and Politics in Queen Anne s Britain will be required reading for opera scholars and cultural and political historians of eighteenth century Britain as well those interested in the vibrant literature culture of the period

Engineering Systems with Intelligence

S.G. Tzafestas, 2012-12-06 This book contains a selection of papers presented at the European Robotics and Intelligent Systems Conference EURISCON 91 held in Corfu Greece June 23 28 1991 It is devoted to the analysis design and applications of technological systems with built in intelligence achieved through appropriate blending of mathematical symbolic sensing computer processing and feedback control concepts methods and software hardware tools System intelligence includes human like capabilities such as learning observation perception interpretation reasoning planning decision making and action Integrated intelligent decision and control systems obey Saridis principle of Increasing Precision with Decreasing Intelligence IPDI and have a hierarchical structure with three basic levels namely Organization Coordination and Execution Levels As we proceed from the organization to the execution level the precision about the jobs to be completed increases and accordingly the intelligence required for these jobs decreases As an example it is mentioned here that in an intelligent robotic system the organization tasks can be realized using a neural net the coordination tasks by a Petri net and the execution tasks by local sensors and actuators The field of intelligent systems is a new interdisciplinary field with continuously increasing interest and expansion It is actually the outcome of the synergetic interaction and cooperation of

classical fields such as system theory control theory artificial intelligence operational research information theory electronics communications and others

The Cultural and Political Legacy of Anne de Bretagne Cynthia Jane Brown, 2010 A queen who helped define the cultural landscape of her era As duchess of Brittany 1491 1514 and twice queen of France 1491 98 1498 1514 Anne de Bretagne set a benchmark by which to measure the status of female authority in Europe at the dawn of the Renaissance Although at times a traditional political pawn when men who ruled her life were involved in reshaping European alliances Anne was directly or indirectly involved with the principal political and religious European leaders of her time and helped define the cultural landscape of her era Taking a variety of cross disciplinary perspectives these ten essays by art historians literary specialists historians and political scientists contribute to the ongoing discussion of Anne de Bretagne and seek to prompt further investigations into her cultural and political impact At the same time they offer insight of a broader nature into related areas of intellectual interest patronage the history of the book the power and definition of queenship and the interpretation of politico cultural documents and court spectacles thereby confirming the extensive nature of Anne s legacy CYNTHIA J BROWN is Professor of French at the University of California Santa Barbara

Moral Exemplars in the Analects Amy Olberding, 2013-03-01 In this study Olberding proposes a new theoretical model for reading the Analects Her thesis is that the moral sensibility of the text derives from an effort to conceptually capture and articulate the features seen in exemplars exemplars that are identified and admired pre theoretically and thus prior to any conceptual criteria for virtue Put simply Olberding proposes an origins myth in which Confucius already and prior to his philosophizing knows whom he judges to be virtuous The work we see him and the Analects authors pursuing is their effort to explain in an organized generalized and abstract way why pre theoretically identified exemplars are virtuous Moral reasoning here begins with people and with inchoate experiences of admiration for them The conceptual work of the text reflects the attempt to analyze such people and parse such experiences in order to distill abstract qualities that account for virtue and can guide emulation

The Structure of Small Molecules and Ions Ron Naaman, Zeev Vager, 2012-12-06 The workshop on The structure of small molecules and ions was held at the Neve Han guest house near Jerusalem Israel on December 13 to 18 in memory of the late Professor Itzhak Plesser Professor Plesser played a central role in the research done both at the Weizmann Institute and at Argonne National Laboratories on the Coulomb explosion method His friends honored his memory by organizing a meeting in which subjects related to Plesser s interests would be discussed Just a week before the conference started we were struck by another tragedy the death of our graduate student Ms Hana Kovner who participated in many of the Coulomb explosion experiments at the Weizmann Institute We would like to dedicate these proceedings to her memory as well The goal of the workshop was to bring together chemists and physicists working on different aspects of the structural problems of small molecular entities The time seemed appropriate for discussing experimental and theoretical concepts since in recent years new methods have been introduced and a large amount of information has been accumulated

on systems not studied before like unstable molecules ions van der Waals molecules and clusters The program of the workshop reflects we believe these new developments The meeting was characterized by intensive discussions in which the weak nesses and strengths of new and of well established concepts were revealed We hope that it measured up to the high standards Itzhak Plessner maintained all through his scientific life

Redeeming the Southern Family Scott Stephan,2011-12-01

In the years leading up to the Civil War southern evangelical denominations moved from the fringes to the mainstream of the American South Scott Stephan argues that female Baptists Methodists and Presbyterians played a crucial role in this transformation While other scholars have pursued studies of southern evangelicalism in the context of churches meetinghouses and revivals Stephan looks at the domestic rituals over which southern women had increasing authority from consecrating newborns to God s care to ushering dying kin through life s final stages Laymen and clergymen alike celebrated the contributions of these pious women to the experience and expansion of evangelicalism across the South This acknowledged domestic authority allowed some women to take on more public roles in the conversion and education of southern youth within churches and academies although always in the name of family and always cloaked in the language of Christian self abnegation At the same time however women s work in the name of domestic devotion often put them at odds with slaves children or husbands in their households who failed to meet their religious expectations and thereby jeopardized evangelical hopes of heavenly reunification of the family Stephan uses the journals and correspondence of evangelical women from across the South to understand the interconnectedness of women s personal family and public piety Rather than seeing evangelical women as entirely oppressed or resigned to the limits of their position in a patriarchal slave society Stephan seeks to capture a sense of what agency was available to women through their moral authority

Advanced Information Networking and Applications Leonard Barolli,Farookh Hussain,Tomoya Enokido,2022-03-30

This book covers the theory design and applications of computer networks distributed computing and information systems Networks of today are going through a rapid evolution and there are many emerging areas of information networking and

their applications Heterogeneous networking supported by recent technological advances in low power wireless communications along with silicon integration of various functionalities such as sensing communications intelligence and actuations is emerging as a critically important disruptive computer class based on a new platform networking structure and interface that enable novel low cost and high volume applications Several of such applications have been difficult to realize because of many interconnections problems To fulfill their large range of applications different kinds of networks need to collaborate and wired and next generation wireless systems should be integrated in order to develop high performance computing solutions to problems arising from the complexities of these networks The aim of the book Advanced Information Networking and Applications is to provide the latest research findings innovative research results methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications
