HUMAN ANATOMY AND PHYSIOLOGY

Study of the human organism and its internal body

Anatomy

The study of the structure and organization of the human body

Physiology

The study of the function and processes of the human body

Structural levels

Studying the human body at the different levels of structure and function

- 1. Chemical level - study of the chemical composition of the body
- 2. Cellular level - study of the structure and function of cells
- 3. Tissue level - study of the structure and function of tissues
- 4. Organ level - study of the structure and function of organs
- 5. System level - study of the structure and function of body systems
- 6. Organism level - study of the structure and function of the whole body

CELLS AND TISSUES

Cells are the basic units of structure and function of the body

Characteristics of cells

All cells are eukaryotic and have a nucleus

Cells are specialized for their function

Cells are surrounded by a cell membrane

Cells are connected to each other

Cells are constantly changing

The Epithelium is the outermost layer of the body

Epithelium is made of cells that are closely packed together

Epithelium is the most common type of tissue

Epithelium is constantly changing

Epithelium is the first line of defense against the environment

NERVOUS SYSTEM

Functions

- 1. Sensory - receive information from the environment
- 2. Integrative - process information and make decisions
- 3. Motor - control the body's response to the environment
- 4. Homeostasis - maintain the body's internal environment
- 5. Communication - coordinate the body's activities
- 6. Control - regulate the body's functions

Structure

The nervous system is made up of the brain and the spinal cord

The brain is the control center of the body

The spinal cord is the main communication pathway between the brain and the rest of the body

Nerves are bundles of axons that carry information between the brain and the rest of the body

Neurons are the basic units of the nervous system

IMMUNE SYSTEM

The immune system is the body's defense against disease

Types of immunity

1. Innate immunity - the body's first line of defense

2. Adaptive immunity - the body's second line of defense

3. Passive immunity - the body's third line of defense

4. Active immunity - the body's fourth line of defense

5. Natural immunity - the body's fifth line of defense

6. Artificial immunity - the body's sixth line of defense

7. Herd immunity - the body's seventh line of defense

8. Vaccine immunity - the body's eighth line of defense

9. Immunity of memory - the body's ninth line of defense

10. Immunity of resistance - the body's tenth line of defense

ORGAN SYSTEMS OF THE BODY

The body is made up of many organ systems that work together to maintain life

The organ systems are the body's way of organizing its parts

The organ systems are the body's way of responding to the environment

The organ systems are the body's way of maintaining homeostasis

The organ systems are the body's way of communicating with each other

The organ systems are the body's way of controlling its functions

The organ systems are the body's way of protecting itself from disease

The organ systems are the body's way of repairing itself after injury

The organ systems are the body's way of growing and developing

The organ systems are the body's way of reproducing

The organ systems are the body's way of surviving

The organ systems are the body's way of thriving

The organ systems are the body's way of flourishing

The organ systems are the body's way of excelling

The organ systems are the body's way of achieving greatness

The organ systems are the body's way of reaching for the stars

The organ systems are the body's way of touching the sky

The organ systems are the body's way of soaring above the clouds

The organ systems are the body's way of flying high above the world

The organ systems are the body's way of reaching the top of the mountain

The organ systems are the body's way of conquering the world

The organ systems are the body's way of achieving the impossible

The organ systems are the body's way of creating the future

The organ systems are the body's way of making the world a better place

The organ systems are the body's way of leaving a lasting legacy

ENDOCRINE SYSTEM

The endocrine system is the body's chemical messengers

The endocrine system is the body's way of communicating with each other

The endocrine system is the body's way of maintaining homeostasis

The endocrine system is the body's way of controlling its functions

The endocrine system is the body's way of protecting itself from disease

The endocrine system is the body's way of repairing itself after injury

The endocrine system is the body's way of growing and developing

The endocrine system is the body's way of reproducing

The endocrine system is the body's way of surviving

The endocrine system is the body's way of thriving

The endocrine system is the body's way of flourishing

The endocrine system is the body's way of excelling

The endocrine system is the body's way of achieving greatness

The endocrine system is the body's way of reaching for the stars

The endocrine system is the body's way of touching the sky

The endocrine system is the body's way of soaring above the clouds
