Vistas de España Mary Elizabeth Boone, 2007-01-01 In the decades following the American Civil War and leading up to the First World War a definitive shift in power took place between Spain and the United States This original book explores American artists perceptions of Spain during this period of turmoil and demonstrates how their responses to Spanish art helped to answer emerging complex questions about American national identity M Elizabeth Boone focuses on works by Thomas Eakins Mary Cassatt William Merritt Chase John Singer Sargent Robert Henri and other American artists who traveled to Spain to study the achievements of such great masters as Murillo Velazquez and Goya The resulting American paintings some well known and others now largely forgotten provide intriguing insights not only into the 19th century American struggle to define itself as an imperial power but also into the relations between the United States and the Spanish speaking world today VISTA Volunteer ,1968 *Vistas hispánicas* Clay Benjamin Christensen, David E. Gil, Heather Marsden, 2013-06-26 This book proposes that research into generative second language acquisition GenSLA can be applied to the language classroom Assuming that Universal Grammar plays a role in second language development it explores generalisations from GenSLA research The book aims to build bridges between the fields of generative second language acquisition applied linguistics and language teaching and it shows how GenSLA is poised to engage with researchers of second language learning outside the generative paradigm Each chapter of Universal Grammar and the Second Language Classroom showcases ways in which GenSLA research can inform language pedagogy Some chapters include classroom research that tests the effectiveness of teaching particular linguistic phenomena Others review existing research findings discussing how these findings are useful for language pedagogy All chapters show how generative linguistics can enhance teachers expertise in language and second language development This groundbreaking volume ably takes on the gap that currently exists between generative linguistic theory in second language acquisition GenSLA and second language pedagogy by gathering chapters from GenSLA researchers who are interested in the relevance and potential application of their research to second foreign language teaching It offers a welcome and thought provoking contribution to any discussion of the relation between linguistic theory and practice I recommend it not only for language teachers interested in deepening their understanding of the formal properties of the languages they teach but also for linguists interested in following up on more practical consequences of the fruits of their theoretical and empirical research Donna Lardiere Georgetown University Washington DC USA *VISTA Volunteer* Volunteers in Service to America, 1970

She isolates and uncovers the nuances of bodily representation ultimately showing how the body and the emergent nation were mutually constructed at a critical historical moment for both

Assessment in Higher Education Samuel J. Messick,2013-12-16 Assessment in Higher Education brings together in one place most of the major issues confronting higher education in the 1990s These include enhancing student access development and success in higher education transforming admissions testing to meet expanding educational needs resolving the politics of accountability by assessing quality outcomes of higher education assuring fair assessment responsive to human diversity and facing the technological future of higher education An integrative thread that weaves through all of these issues is the concept of equity especially as it bears on social justice in education and on fairness in assessment Another integrative thread is the role of computer and multimedia technology not only in improving the efficiency and power of all the functions of higher education assessment but also in revolutionizing the delivery of higher education itself
