**Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy** Joy E. Akahome,Michael Twum-Darko,Cyril Ogbokor,Nyaniso Mfusi Zonke,T. Sethibe,R. Steyn,Esme Mohammed,Renier Steyn,L.B. Nguenang,Mamorena Lucia Matsoso,Henry N. Ozuru,Julius Akaba,Patience Rambe,Edem Korku Agbobli,Henri-Vincent Ndjave-Ndjoy,Regis Muchemwa,Andre de la Harpe,Konosoang Mpiti,Ayodeji Afolayan,2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the

nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment

**Contemporary Challenges in Immunologic Testing in Clinical and Research Laboratories** Pablo Engel,Edward K.L. Chan,Michael Kirschfink,Luis Eduardo Coelho Andrade,Stefan Vieths,2023-08-24 Along the last several decades it has been progressively appreciated that immunology plays an overwhelming role in the physiology and pathophysiology of most organs tissues and biological systems in multicellular organisms Accordingly several immunological parameters are used in research and clinical laboratories with the purpose of investigating diagnosing and monitoring a variety of pathological conditions The rapidly evolving field of laboratory testing in immunology poses several challenges to professionals working in research and clinical laboratories medical practice educational activities in vitro diagnostic industry and regulatory agencies Regular analytes such as albumin glucose and insulin are homogeneous among individuals of the same species This property represents an advantage when it comes to optimize the determination methods as well as to establish standardization and quality assessment strategies In contrast several immunologic analytes present tremendous variability across individuals in the same species In fact some are unique at the individual level For example the repertoire of immunoglobulins specific for a given pathogen e g rubella is specific for each individual in terms of the balance of targeted antigens and epitopes immunoglobulin isotypes antibody

avidity Fc glycosylation rate and so on As a corollary the panel of anti rubella antibodies is necessarily different from one to other individual This also applies to autoantibodies and to IgE to allergens Polymorphism is prevalent for other immunologic parameters such as Complement components cell receptors cluster differentiation molecules CD and downstream signal transduction mediators **Annual Performance Plan** Mpumalanga (South Africa).
