network modeling and visualization are also presented Many studies are validated through real social networks such as Twitter This edited work will appeal to researchers practitioners and students interested in the latest developments of social network analysis COVID-19 Pandemic Impact on New Economy Development and Societal Change Popescu, Cristina Raluca Gh.,2021-12-17 Globalization and technological advances have the immense power to create a new economy address sustainability concerns and facilitate societal changes In addition the COVID 19 pandemic has led to notable modifications in the world economy and society that require adjustments to business models as well as our way of life It is critical to understand these new models in our changing society for businesses to not only survive but to thrive COVID 19 Pandemic Impact on New Economy Development and Societal Change provides an updated view of the newest trends novel practices and latest tendencies concerning the manner of shaping the new economy and accelerating societal change demonstrating the crucial importance of rethinking the world s models priorities and strategies while seeking a more responsible path for humanity Covering topics such as tourism and salesmanship skills this publication is ideal for academicians researchers scientists scholars practitioners industry professionals consultants instructors and students **The Sociocultural Context of Psychosocial Interventions** Francisco José Eiroa-Orosa,Tim Lomas,Michael Rowe,2018-12-06 Across diverse academic fields scholars and practitioners are engaged in developing interventions to promote outcomes like health and quality of life Indeed such is the apparent efficacy of such interventions that there are many policy led initiatives to implement these at national and international scales However few scholars or practitioners have thought in any systematic and critical way about the importance of contextualizing these interventions i e considering how the impact of such interventions may be affected and mediated by specific sociocultural factors from gender to ethnicity and socio economics The aim of the Research Topic The Sociocultural Context of Psychosocial Interventions was to address this lacuna As such we tried to help bringing a more contextual mindset to the implementation of health and wellbeing interventions This may help to shift the way such interventions are designed and implemented both at a granular local level i e influencing individual practitioners and at a large scale macro level e g influencing policy makers Themes within this Research Topic have concerned both macro sociocultural as well as meso and micro layers and the peculiarities of implementing real world research based on these levels There has been room for physical and mental health for family relationships for educational contexts and even for the effects of crime Some works have included interesting methodological discussions on the integration of different ecological layers or the modal distribution of our interests For us it has been very important to work giving a greater diffusion to these issues since considering psychosocial interventions in the context in which they occur goes beyond an epistemological or methodological discussion Rather these considerations seriously affect the ability of practitioners to really reach the people who need their interventions listening to their needs and respecting their preferences For the editors of this book then the contextualization of interventions means considering the people who receive them as full citizens immersed in complex

societies where factors such as social justice and health or well being do not float apart in space but affect each other dialectically We therefore think that the duty of both academics and practitioners is not to forget that it is as important to evaluate the direct effect of our interventions as the influence we have in the society as a whole when we carry them out We hope you enjoy reading these works and that their dissemination stimulates new lines of research committed to both good practise and social transformation
