Nicolle Carr,2025-11-25 Navigating Ethics in Behavior Analysis considers the elusive topic of ethics in the professional context of behavioral analysis Students often assume their Applied Behavior Analysis Ethics class is going to be an easy A that it takes no more than common sense and a good moral compass to determine the line between right and wrong But as they quickly learn ethics are different from laws morals and common sense and when a variable is modified from how it was originally learned students can be at a loss for how to critically think through the situation Drawing from her extensive experience in both teaching and practice Nicolle Carr highlights the importance of critical thinking when considering questions of ethics in behavior analysis She examines the history and creation of the Behavior Analysis Certification Board s BACB current ethical code before exploring well known and novel approaches to navigating the ethical decision making process with added emphasis on contextual understanding These approaches are then applied in real world scenarios in schools clinics homes residential facilities higher education and within Organizational Behavior Management

Carr concludes by walking the reader through the process of an ethical violation from trying to solve an issue alone and ensuring the person falls under the BACB's jurisdiction to submitting the appropriate documents and what to expect as the process continues. Probabilistic Topic Model Inference for Textual Data Måns Magnusson, 2018-04-27 Probabilistic topic models have proven to be an extremely versatile class of mixed membership models for discovering the thematic structure of text collections. There are many possible applications covering a broad range of areas of study: technology, natural science, social science, and the humanities. In this thesis, a new efficient parallel Markov Chain Monte Carlo inference algorithm is proposed for Bayesian inference in large topic models. The proposed methods scale well with the corpus size and can be used for other probabilistic topic models and other natural language processing applications. The proposed methods are fast, efficient, scalable, and will converge to the true posterior distribution. In addition, in this thesis, a supervised topic model for high dimensional text classification is also proposed with emphasis on interpretable document prediction using the horseshoe shrinkage prior in supervised topic models. Finally, we develop a model and inference algorithm that can model agenda and framing of political speeches over time with a priori defined topics. We apply the approach to analyze the evolution of immigration discourse in the Swedish parliament by combining theory from political science and communication science with a probabilistic topic model.

Probabilistiska mnesmodeller: topic models är en mångsidig klass av modeller för att estimeras mnessammansättningarna i stora korpusar. Applikationer finns i ett flertal vetenskapsområden som teknik, naturvetenskap, samhällsvetenskap och humaniora. I denna avhandling föreslås nya effektiva och parallella Markov Chain Monte Carlo algoritmer för Bayesianiska mnesmodeller. De föreslagna metoderna skalar väl med storleken på korpuset och kan användas för flera olika mnesmodeller och liknande modeller inom språkteknologi. De föreslagna metoderna är snabba, effektiva, skalbara och

konvergerar till den sanna posteriorfördelningen Dessutom föreslås en mnesmodell för högdimensionell textklassificering med tonvikt på tolkningsbar dokumentklassificering genom att använda en kraftigt regulariserande priorfördelningar Slutligen utvecklas en mnesmodell för att analysera agenda och framgång för ett förutbestämt mne Med denna metod analyserar vi invandringsdiskursen i Sveriges Riksdag varje tid genom att kombinera teori från statsvetenskap kommunikationsvetenskap och probabilistiska mnesmodeller
