Bozarth, M.A. (1983). Opiate reward mechanisms mapped by intracranial self-administration. In J.E. Smith and J.D. Lane (eds.), *Neurobiology of Opiate Reward Processes* (pp. 331-339). Amsterdam: Elsevier/North Holland Biomedical Press. [This is an example of an article published in a book.]

This book chapter reviews data suggesting that the ventral tegmental area is critically involved in opiate reward. In addition it presents the first of several theoretical reviews by the author suggesting that opiate and psychomotor stimulant reinforcement involves activation of the same dopaminergic substrate. (By the mid-1980s the notion that different addictive drugs might share a common reward substrate would become paradigmatic for the study of drug reinforcement and addiction.) Control procedures and other methodological issues for conducting intracranial self-administration studies are also discussed.

Bozarth, M.A. (1987). (ed.) *Methods of Assessing the Reinforcing Properties of Abused Drugs*. New York: Springer-Verlag. [This is an example of a book citation.]

This book provides the definitive compendium of the experimental methods used to study drug reinforcement. Thirty chapters written by leading experts in each technique provide synopses of the experimental procedures. Both preclinical and clinical methods are presented, grouped by general approach (e.g., preclinical reinforcement studies, preclinical conditioning methods, clinical subjective-effects measures, clinical self-administration procedures). Most chapters present an overview and review of an experimental method, while some chapters provide original experimental data illustrating specific applications of a technique.

Interestingly, none of the researchers presented physical dependence tests as a method of assessing potential drug reinforcement; this is probably because of the editor's assertion that physical dependence is not a **primary** motivation for drug-taking behavior and because of the obvious consensus shared by his contributing authors. The book sold-out shortly after its publication and has not been reprinted. It is, however, available in its entirety on the Internet at www.AddictionScience.net and can be downloaded chapter-by-chapter without charge.

Textual and Contextual Analysis in Empirical Translation Studies Sara Laviosa, Adriana Pagano, Hannu Kemppanen, Meng Ji, 2016-07-28 This book presents the state of art research in ETS by illustrating useful corpus methodologies in the study of important translational genres such as political texts literature and media translations Empirical Translation Studies ETS represents one of the most exciting fields of research It gives emphasis and priority to the exploration and identification of new textual and linguistic patterns in large amounts of translation data gathered in the form of translation data bases A distinct feature of current ETS is the testing and development of useful quantitative methods in the study of translational corpora In this book Hannu Kemppanen explores the distribution of ideologically loaded keywords in early Finnish translation of Russian political genres which yielded insights into the complex political relation between Finland and Russia in the post Soviet era Adriana Pagano uses multivariate analysis in the study of a large scale corpus of Brazilian fiction translations produced between 1930s 1950s which is known as the golden age of Latin American translation The statistical analysis detected a number of translation strategies in Brazilian Portuguese fictional translations which point to deliberate efforts made by translators to re frame original English texts within the Brazilian social and political context in the first three decades under investigation Meng Ji uses exploratory statistical techniques in the study of recent Chinese media translation by focusing three important media genres i e reportage editorial and review The statistical analysis effectively detected important variations among three news genres which are analysed in light of the social and communicative functions of these news genres in informing and mobilising the audience in specific periods of time in Mainland China

Meta-Analysis, Decision Analysis, and Cost-Effectiveness Analysis Diana B. Petitti, 1999-10-14 Meta analysis decision analysis and cost effectiveness analysis are the cornerstones of evidence based medicine These related quantitative methods have become essential tools in the formulation of clinical and public policy based on the synthesis of evidence All three methods are taught with increasing frequency in medical schools and schools of public health and in health policy courses at the undergraduate and graduate level This book is a lucid introduction and will serve the needs of students taking introductory courses that cover these topics It will also be useful to clinicians and policymakers who need to understand the quantitative underpinnings of the methods in order to best apply the information that derives from them The second edition of this popular book adds new material on cumulative meta analysis as a method to explore heterogeneity The coverage of cost effectiveness analysis has been brought into close alignment with recommendations of the U S Public Health Panel on Cost Effectiveness Analysis in Health and Medicine Many of the examples have been replaced with more current examples and all of the material has been updated to reflect recent advances in the methods and the emergence of consensus about some previously controversial issues analysis These three closely related methods have become even more important for synthesizing research since the first edition was published in 1994 And they have gained legitimacy as tools for guiding
