

THE SKELETON
The skeleton is the framework of the body, supporting the soft organs and tissues. It is composed of bones and cartilage. The bones are made of a hard, white, mineralized substance called bone tissue. The cartilage is a soft, white, jelly-like substance. The skeleton is divided into the axial skeleton (skull, spine, and rib cage) and the appendicular skeleton (arms and legs).

THE MUSCLES
The muscles are the soft tissue that contracts to move the bones. They are made of muscle fibers. The muscles are divided into the skeletal muscles (attached to bones) and the smooth muscles (not attached to bones). The skeletal muscles are voluntary muscles, meaning they can be controlled by the conscious mind. The smooth muscles are involuntary muscles, meaning they cannot be controlled by the conscious mind.

THE JOINTS
The joints are the points where two or more bones meet. They allow the bones to move relative to each other. There are three main types of joints: fibrous joints, cartilaginous joints, and synovial joints. Fibrous joints are the least movable, cartilaginous joints are slightly more movable, and synovial joints are the most movable.

THE NERVOUS SYSTEM
The nervous system is the body's communication system. It consists of the brain, spinal cord, and nerves. The brain is the control center of the body. The spinal cord is a long, thin, tube-like structure that runs down the back. The nerves are thin, thread-like structures that branch out from the spinal cord to the rest of the body. The nervous system controls the body's movements and functions.

The blood vessels are the tubes that carry the blood. The blood is the fluid that carries the oxygen and nutrients to the cells. The circulatory system is essential for the body's survival.

THE IMMUNE SYSTEM
The immune system is the body's defense system. It consists of the white blood cells, antibodies, and the lymphatic system. The white blood cells are the soldiers of the immune system. The antibodies are the weapons. The lymphatic system is the transport system for the immune system. The immune system protects the body from disease.
