

Level 2a: Additional Help and Level 2b: Focused Help for Multiple Needs

Needs of the Child	Example Services/Support	Practitioner Response
Children with additional or multiple needs, who would benefit from extra support – often from practitioners who are already involved with the family. Level 2a: These children require additional support usually from a single agency to address the concern that has been identified. These children require additional targeted support from a single agency to address the concern that has been identified. Level 2b: This is the level at which there is a need for a clear coordinated multi-agency response and a multi-agency Early Help Assessment may be appropriate or a response to a short-term crisis such as bereavement, parental separation and other relationship issues may be required.	Examples include: ✓ School holiday and short breaks provision for disabled children ✓ Behavioural / Learning support ✓ Educational Psychologist ✓ Special Educational Needs (SEN) support ✓ Parenting Group programmes ✓ Early Help Family Work ✓ Speech and language therapy ✓ Drug and alcohol early intervention ✓ Domestic abuse early intervention ✓ Targeted youth work ✓ Housing support ✓ Education Welfare service ✓ Extra health support for family members ✓ Help to find education and employment ✓ Group work accessed through Children's Centres ✓ Primary mental Health Workers ✓ CAMHS <i>Services and support from Level 1 should be utilised where appropriate.</i>	Practitioners should talk to the family, carry out an assessment and should also engage with appropriate services to work with them. Discussion with the One Reading Partnership Hub may be helpful. In cases involving multiple needs and increasing complexity, practitioners should contact the Children's Single Point of Access (CSPOA) within Brighter Futures for Children. If the threshold for statutory intervention has not been met, they will open an Early Help Enquiry. They will review the needs of the child and their family. This could lead to provision of advice and guidance; follow up from the One Reading Partnership Coordinator; invitation to a One Reading Partnership Hub meeting or an allocation of a Brighter Futures Early Help service. To ensure the child receives the right help, at the right time, from the right people.

Relaxation Processes in Molecular Excited States J. Fünfschilling, 2012-12-06 Relaxation phenomena of excited molecular states are abundant in all nature They mediate such key processes as photochemical reactions or even the pathways of ordinary chemical reactions However for a long time the main research in electronic relaxation processes was concerned with anorganic solids in part because of their great technological importance photography semiconductors in part also because these compounds were the workhorses of the solid state physicists In the last 30 years there was a steadily increasing interest in organic molecular systems first in molecular crystals and later in all forms of molecular solids glasses polymers membranes The present volume combines papers on quite different types of relaxation phenomena the type of solid studied the electronic states involved the physical processes responsible for the relaxations are all different Nevertheless after reading this book a more clear and complete picture of the phenomenon relaxation emerges that proves that this

volume is more than just a collection of individual articles The volume starts with the paper Spin lattice and spin spin relaxation in photo excited triplet states in molecular crystals by Jan Schmidt Even in these seemingly simple systems of isolated guest molecules in a single crystal host the relaxation phenomena are quite involved and a very thorough investigation is necessary to find the key relaxation processes The end of the article provides a bridge to the following paper it treats interactions of two molecules dimers where resonant interactions become important and lead to new characteristic relaxation processes [Innovating to Learn, Learning to Innovate](#) OECD,2008-11-03 This book summarises and discusses key findings from the learning sciences shedding light on the cognitive and social processes that can be used to redesign classrooms to make them highly effective learning environments [Foreign Language Proficiency in Higher Education](#) Paula Winke,Susan M. Gass,2018-12-18 This volume comprises of chapters that deal with language proficiency relating to a wide range of language program issues including curriculum assessment learners and instructors and skill development The chapters cover various aspects of a broad based proficiency initiative focusing on numerous aspects of foreign language learning including how skills develop how assessments can inform curriculum how learners and instructors view proficiency and proficiency assessment and how individual use of technology furthers language learning The concluding chapter points the way forward for issues and questions that need to be addressed
