Slope Safety Preparedness for Impact of Climate Change Ken Ho,Suzanne Lacasse,Luciano Picarelli,2017-06-01 Many countries are increasingly threatened by major landslide disasters and fatalities due to extreme weather events which have major implications for public safety and the sustainability of infrastructure and the built environment A further increase in such a trend could come from climate change This book helps to fill in the gap due to the fact that landslide hazards are commonly not covered under the policy debate on climate change The book highlights the importance of raising awareness to the challenges of landslide hazards due to climate impact It provides a holistic frame for understanding the key issues and new tools that could be used to assess and manage the landslide risks The book gathers contributions from 21 countries and regions in the form of national reports or summaries with respect to four key aspects a the methods used for evaluating changing weather and changing landslide patterns b the changing weather patterns c the changing landslide patterns and hazard scenarios d the applications to risk management and the formulation of adaptation measures Recommendations are made for enhanced preparedness and resilience Improved crisis management and areas for future work are suggested

The Palgrave Handbook of Global Sustainability Robert Brinkmann,2023-04-04 The field of sustainability continues to evolve as a discipline The world is facing multiple sustainability challenges such as climate change water depletion ecosystem loss and environmental racism The Handbook of Sustainability will provide a comprehensive reference for the field that examines in depth the major themes within what are known as the three E s of sustainability environment equity and economics These three themes will serve as the main organizing body of the work In addition the work will include sections on history and sustainability major figures in the development of sustainability as a discipline and important organizations that contributed or that continue to contribute to sustainability as a field The work is explicitly global in scope

as it considers the very different issues associated with sustainability in the global north and south *Feeling the Heat: Adapting to Climate Change in the Middle East and Central Asia* Mr. Christoph Duenwald, Mr. Yasser Abdih, Mrs. Kerstin Gerling, Vahram Stepanyan, Abdullah Al-Hassan, Gareth Anderson, Ms. Anja Baum, Mr. Sergejs Saksonovs, Lamiae Agoumi, Chen Chen, Mehdi Benatiya Andaloussi, Sahra Sakha, Faten Saliba, Jesus Sanchez, 2022-03-30 Climate change is among humanity's greatest challenges and the Middle East and Central Asia region is on the frontlines of its human economic and physical ramifications. Much of the region is located in already difficult climate zones where global warming exacerbates desertification, water stress and rising sea levels. This trend entails fundamental economic disruptions, endangers food security and undermines public health with ripple effects on poverty and inequality, displacement and conflict. Considering the risks posed by climate change, the central message of this departmental paper is that adapting to climate change by boosting resilience to climate stresses and disasters is a critical priority for the region's economies. *Ski*, 1975-02 The Climate Revealed William Burroughs, 1999-10-28 El Niño La Niña a global warming terms that crop up frequently in current media coverage of anomalous weather conditions: a spring thaw in January in New York City, a snowstorm in Bakersfield, California, winterlike temperatures in Miami. Such phenomena as these and reports of devastating droughts, floods and storms around the world bring home the fact of how deeply climate affects our daily lives and of our inability to control the consequences of climatic events. Extraordinarily timely, *The Climate Revealed* explores the human climate relationship in all its fascinating complexity. Packed with 250 beautiful full color photographs, the volume travels the globe to provide a detailed portrait of individual climate zones from the polar icecaps to the fiercest deserts. The expert and highly accessible text uncovers the essential elements: earth, air, fire and water that make up the world's various climates. William Burroughs reveals the dramatic discoveries and techniques of historians and archaeologists in their search to understand climates of the past. In the book's conclusion, he considers the future and presents every facet of the current environmental debate. With its detailed coverage of the past, present and future, this marvelous work is essential reading for all those who want to understand one of the most critical facets of life: climate. William Burroughs is a well known and successful science author who has written four books on the weather including *Does the Weather Really Matter* 1997, *Weather Cycles: Real or Imaginary* 1992 and *Watching the World's Weather* 1991, all published by Cambridge University Press.
