Math Goes to the Movies Burkard Polster, Marty Ross, 2012-08-31 Mel Gibson teaching Euclidean geometry Meg Ryan and Tim Robbins acting out Zeno's paradox Michael Jackson proving in three different ways that $7 \times 13 = 28$ These are just a few of the intriguing mathematical snippets that occur in hundreds of movies Burkard Polster and Marty Ross pored through the cinematic calculus to create this thorough and entertaining survey of the quirky fun and beautiful mathematics to be found on the big screen Math Goes to the Movies is based on the authors own collection of more than 700 mathematical movies and their many years using movie clips to inject moments of fun into their courses With more than 200 illustrations many of them screenshots from the movies themselves this book provides an inviting way to explore math featuring such movies as Good Will Hunting A Beautiful Mind Stand and Deliver Pi Die Hard The Mirror Has Two Faces The authors use these iconic movies to introduce and explain important and famous mathematical ideas higher dimensions the golden ratio infinity and much more Not all math in movies makes sense however and Polster and Ross talk about Hollywood's most absurd blunders and outrageous mathematical scenes Interviews with mathematical consultants to movies round out this engaging journey into the realm of cinematic mathematics This fascinating behind the scenes look at movie math shows how fun and illuminating equations can be

Butterflies on a Sea Wind Anne Rudloe, 2012-11-06 This memoir by a marine biologist sings the life of a beginning Zen practitioner with a haunting beautiful appreciation of the natural world Publishers Weekly Anne Rudloe was attracted to Zen as a college student But it seemed premature for a twenty one year old to focus on

the difficulties of life when she d hardly begun to live Twenty five years later she was ready to explore the spiritual discipline that originated in Asian monasteries more than a millennium ago Rudloe s quest is compellingly chronicled in *Butterflies on a Sea Wind* which combines the rigor of formal monastic Zen practice with the challenges of integrating Zen concepts into modern daily life Her narrative describes both the physical and mental demands of Zen retreats and how she applied what she learned there to her work as a marine biologist in Florida as well as to the rigors of raising children and caring for an elderly grandmother In words that intimately draw in her readers she describes how Zen helps us look inward and use the wisdom we find there to reach out to others During the 1990s the number of organized Buddhist centers in this country grew more than 40 percent from 429 to 1 062 While there are many books about Zen on the market today few give a clear picture of what it s like to actually sit down and begin a meditation practice and then apply it to a daily life Likewise few books discuss the types of issues most people face every day raising a family and earning a living *Butterflies on a Sea Wind* does all this and more
