Answered Element Guide Miscarriage Question Series:

Journeys Through Grief Tammie Thomson,1998-01-07 As a bereaved parent you're often alone it's to make people understand just what you're going through and what you need from them And as a support person it's hard to know what to say what to do what to expect and how to help our bereaved friends With stories from over 60 parents grandparents and siblings who have been through the death of a child and honest comments on the support they received and needed this book is just what bereaved families and caring professionals need

Making the Grades Todd Farley,2011-01-01

In this alternately amusing and appalling exposé of the standardized test industry fifteen year veteran Todd Farley describes statisticians who make decisions about students without even looking at their test answers state education officials willing to change the way tests are scored whenever they don't like the results and massive multi-national for-profit testing companies who regularly opt for expediency and profit over the altruistic educational goals of teaching and learning Although there are absurd moments as when Farley and coworkers had to grade students based on how they described the taste of their favorite food the enormous importance of standardized tests in the post No Child Left Behind era make this no laughing matter This book is dynamite The nice personal voice makes it utterly accessible and enticing wholly apart from the terribly important ammunition it provides to those of us in the testing wars at national and local levels Jonathan Kozol author of *Savage Inequities*

Collective Preferences in Democratic Politics Scott L. Althaus,2003-09-08 Since so few people appear knowledgeable about public affairs one might question whether collective policy preferences revealed in opinion surveys accurately convey the distribution of voices and interests in a society This study the first comprehensive treatment of the relationship between knowledge representation and political equality in opinion surveys suggests some surprising answers Knowledge does matter and the way it is distributed in society can cause collective preferences to reflect disproportionately the opinions of some groups more than others Sometimes collective preferences seem to represent something like the will of the people but frequently they do not Sometimes they rigidly enforce political equality in the expression of political viewpoints but often they do not The primary culprit is not any inherent shortcoming in the methods of survey research Rather it is the limited degree of knowledge held by ordinary citizens about public affairs Accounting for these factors can help survey researchers journalists politicians and concerned citizens better appreciate the pitfalls and possibilities for using opinion polls to represent the people's voice
