periods of conflict Scholarship has focused primarily on the experience of the hoplite after his return with a special emphasis on his susceptibility to Post Traumatic Stress Disorder PTSD but the moments of transition themselves have yet to be explored in detail Taking each in turn Owen Rees examines the transitions from two sides from within the domestic environment as a member of an oikos and from within the military environment as a member of the army This analysis presents a new template for each and effectively maps the experience of the hoplite as he moves between his domestic and military duties This allows us to reconstruct the effects of war more fully and to identify moments with the potential for a traumatic impact on the individual
