Management Control Systems and Cross-Cultural Research Michael Hanzlick, 2015-01-31 A fundamental challenge that management faces in the twenty first century is how to exercise adequate control i e how to guide and direct the behaviour of their subordinates With increasing globalisation firms witness a cross cultural impact too Of particular interest is the question of whether to use the standardized form of control similar to the home base of firms or whether to adapt their control practices to the local specificities Given the meagre state of the literature in management control with a cross cultural emphasis this study addresses a real world problem namely the question whether management control practices are configured similarly or differently across cultures Relying on a generalized industry sample across four countries Belgium Canada Germany and Poland this study sought to shed light on one of the more intriguing questions does culture matter for specific control areas in particular for performance measurement performance evaluation and reward systems The theoretical foundations are grounded in the cultural framework of the GLOBE project accompanied by thoughts of new institutionalism stakeholder theory and contingency thoughts Hypotheses are tested by mean comparisons ANOVA ANCOVA The empirical findings highlight cultural differences for a broader set of control practices and deliver new insights into the intersection of culture and management control This dissertation crafts a novel topic with high relevance for both researchers and practitioners The study demonstrates areas for which management control practices should be adapted to the local needs and areas for which those practices could be harmonized in the whole company This monograph stresses some areas in which future empirical cross cultural research can benefit and some areas where conceptual thoughts could be advanced

Fusing Decision Support Systems Into the Fabric of the Context A. Respício, F. Burstein, 2012-06-13 The field of Information Systems has been shifting from an immersion view which relies on the immersion of information technology IT as part of the business environment to a fusion view in which IT is fused within the business environment forming a unified fabric that integrates work and personal life as

well as personal and public information In the context of this fusion view decision support systems should achieve a total alignment with the context and the personal preferences of users The advantage of such a view is an opportunity of seamless integration between enterprise environments and decision support system components Thus researchers and practitioners have to address the challenges of dealing with this shift in viewpoint and its consequences for decision making and decision support systems theories and applications This book presents the latest innovations and advances in decision support systems with a special focus on the fusion view These achievements will be of interest to all those involved and interested in decision making practice and research as well as more generally in the fusion view of modern information systems The book covers a wide range of topical themes including a fusion view of business intelligence and data warehousing applications of multi criteria decision analysis intelligent models and technologies for decision making knowledge management decision support approaches and models for emergency management and medical and other specific domains The Implementation of Smart Technologies for Business Success and Sustainability Allam Hamdan, Haneen Mohammad Shoaib, Bahaaeddin Alareeni, Reem Hamdan, 2022-09-24 Industry 4.0 technologies identified as the main contributor to the digitalization era New technology delivers optimal outputs by utilization of effective resource Therefore smart technologies that has inventive and creative objects became critical to enterprise recent studies shows that its led enterprises business such as SMEs to considerable investments which many organizations over the world attempt to use innovative technologies such as IoT and AI these technologies have potential on sustainable business models In addition to that innovation usage in business models led to significant benefits towards sustainability concept in SMEs marketplace Furthermore Sustainability objectives refers to corporate sustainability term which integrate enterprise operations with social educational environmental and economic benefits as process of decision making can impact during sustainability implications This book focus on the implementation of smart technologies for growing business the book includes research articles and expository papers on the applications of technology on Decision Making Healthcare Smart Universities Advertising E marketing Public Sector and Digital Government FinTech RegTech Some researchers also discussed the role of smart technologies in the current COVID 19 pandemic whether in the health sector education and others On all of these the researchers discussed the impact of smart technologies on decision making in those vital sectors of the economy
