1st Year Semester Timetable

**Nebraska. University, University of
Nebraska (Lincoln campus)**

1st Year Semester Timetable:

Timetable University of Illinois at Urbana-Champaign, 1969 **ECSCW 2005** Hans Gellersen, Kjeld Schmidt, Michel Beaudouin-Lafon, Wendy Mackay, 2006-01-26 The emergence and widespread use of personal computers and network technologies have seen the development of interest in the use of computers to support cooperative work. This volume presents the proceedings of the ninth European conference on Computer Supported Cooperative Work (CSCW). This is a multidisciplinary area that embraces the development of new technologies grounded in actual cooperative practices. These proceedings contain a collection of papers that reflect the variegated research activities in the field. The volume includes papers addressing novel interaction technologies for CSCW systems, new models and architectures for groupware systems, studies of communication and coordination among mobile actors, studies of cooperative work in complex settings, studies of groupware systems in actual use in real world settings, and theories and techniques to support the development of cooperative applications. The papers present emerging technologies alongside new methods and approaches to the development of this important class of applications. The work in this volume represents the best of the current research and practice within CSCW. The collection of papers presented here will appeal to researchers and practitioners alike as they combine an understanding of the nature of work with the possibility offered by new technologies.

Applied Microsoft Analysis Services 2005 Teo Lachev, 2005 Knowledge is power. As its name suggests, the promise of Microsoft SQL Server Analysis Services 2005 is to promote better data analytics by giving information workers the right tool to analyze consistent, timely, and reliable data. Empowered with Analysis Services and the Microsoft Business Intelligence Platform, you are well positioned to solve the perennial problem with data: that there is too much of it and finding the right information is often difficult, if not impossible. **Applied Microsoft Analysis Services 2005** shows database administrators and developers how to build complete OLAP solutions with Microsoft Analysis Services 2005 and the Microsoft Business Intelligence Platform. Database administrators will learn how to design and manage sophisticated OLAP cubes that provide rich data analytics and data mining services. The book gives developers the necessary background to extend UDM with custom programming logic in the form of MDX expressions, scripts, and .NET code. It teaches them how to implement a wide range of reporting applications that integrate with Analysis Services Reporting Services and Microsoft Office. This book doesn't assume any prior experience with OLAP and Microsoft Analysis Services. It is designed as an easy-to-follow guide where each chapter builds upon the previous to implement the components of the innovative Unified Dimensional Model (UDM) in a chronological order. New concepts are introduced with step-by-step instructions and hands-on demos. What's Inside: o Design sophisticated UDM models o Build ETL processes with SSIS o Implement data mining tasks o Enrich UDM programmatically with MDX o Extend UDM with SSAS stored procedures o Create rich end-user model o Optimize Analysis Services storage and processing o Implement dynamic security o Build custom OLAP clients o Author standard and ad hoc reports with SSRS o Build Office-based BI applications
