modernity and empire A relentless technocratic rationality would sweep all in its wake bringing a neoliberal utopia of free markets free speech and increasing productivity Nonetheless as we have begun to experience the backlash against a global world founded on digital fungibility the perils of appeals to nationalism identity and authenticity have become only too apparent The collapse of Soviet Communism left an ideological vacuum that offered no recognized place from which to oppose global capitalism What is the alternative The anxieties and resentments produced by this new world order among those left behind are often manifested in assertions of xenophobia and particularity This is what it supposedly means to be really American truly Muslim properly Chinese The other is coming to take what is ours and we must defend ourselves Digitalizing the Global Text is a collection of essays by an international group of scholars situated squarely at this nexus of forces Together these writers examine how literature culture and philosophy in the global and digital age both enable the creation of these simultaneously utopian and dystopian worlds and offer a resistance to them A joint publication from the University of South Carolina Press and the National Taiwan University Press
