State, Foreign Operations, and Related Programs Appropriations for 2013 United States. Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs, 2012 *Examining the Belt and Road Initiative (BRI)* Juichi Inada, 2025-03-08 This book endeavors to examine the impact of China's rapid ascendance as a donor on the international development assistance regime over the past two decades. China's rapid economic rise and the success of its economic development have led to a notable trend among many developing countries to view the way of China as a Chinese development model and to imitate it. In addition, China itself has been conscious of the challenge to the development theory and international development assistance regime that has been led mainly by the West and has pushed for policies that differ from those of traditional donors. The Belt and Road Initiative (BRI) which was announced in 2013 is emblematic of these distinctive developments in China. The proliferation of the Chinese development model in the context of these international trends has led some to view it as the global spread of the Beijing Consensus which has replaced the Washington Consensus led by the Bretton Woods Institutions that have exerted significant influence in the past. This book presents case studies of several countries based on the author's field research in Cambodia, Sri Lanka, Myanmar, Angola, Rwanda, and other countries. Promoting U.S. Investment in Sub-Saharan Africa R. Hendrickson, 2014-08-19 Addressing an under-studied aspect of U.S. foreign policy towards sub-Saharan Africa, Hendrickson provides a critical historical analysis of institutions designed to promote private investment in the region. She draws attention to the interaction between strategic factors, domestic interests, and the ideas used to achieve consensus on policy. *Angola Operational Plan Report Fy 2013* United States. United States Department of State, 2014-11-12 In 2011, Secretary Clinton called on the world to join in the fight for an AIDS-free generation, and in 2012, the Secretary revealed a PEPFAR President's Emergency Plan for AIDS Relief Blueprint outlining the path to making this a reality. Aligned with the Global Health Initiative (GHI) Strategy, our Partnership Framework (PF), and the Blueprint's policy imperative, Angola's PEPFAR initiatives are based on strategic, scientifically sound investments to scale up core HIV prevention to maximize impact. Based on a capacity building systems strengthening model, PEPFAR Angola is working with partners to effectively mobilize, coordinate, and efficiently use resources to save more lives sooner. The focus will be on key populations, women, and girls to increase gender equality and end stigma and discrimination against people living with HIV. Cross-Cutting Appendix A This will be measured by setting benchmarks that are regularly assessed with the long-term goal of country ownership. The Angola PEPFAR Team will continue to build upon successes of our past, maintaining current programs like supporting the Government of Republic of Angola's GRA INLS INSP CNS decentralization plan with technical assistance in health systems strengthening, implementation of an enhanced Prevention of Mother-to-Child Transmission (PMTCT) services, building GRA human resources by training local surveillance experts to sustain the country's capacity in strategic information, and supporting the military to strengthen its HIV Prevention

Program and promote organizational networking with other military partners at the regional level In addition to continuing programs in fiscal year 2014 Angola PEPFAR will expand PMTCT and HIV testing and counseling in Luanda province and coordinate HIV initiatives across borders to demonstrate collaboration with our neighbors in unity toward an AIDS Free generation The United States Government USG Appendix C utilizes a technical assistance approach in areas identified by the Ministry of Health MoH Secretary Clinton stated in her remarks at the 2012 International AIDS conference that we should continue to be focused on supporting high impact interventions and make tough decisions driven by science This is the fundamental goal of the Angola PEPFAR program

Monthly Catalog of United States Government Publications ,1998 To Govern the Globe Alfred W. McCoy,2021-11-16

In a tempestuous narrative that sweeps across five continents and seven centuries this book explains how a succession of catastrophes from the devastating Black Death of 1350 through the coming climate crisis of 2050 has produced a relentless succession of rising empires and fading world orders During the long centuries of Iberian and British imperial rule the quest for new forms of energy led to the development of the colonial sugar plantation as a uniquely profitable kind of commerce In a time when issues of race and social justice have arisen with pressing urgency the book explains how the plantation s extraordinary profitability relied on a production system that literally worked the slaves to death creating an insatiable appetite for new captives that made the African slave trade a central feature of modern capitalism for over four centuries After surveying past centuries roiled by imperial wars national revolutions and the struggle for human rights the closing chapters use those hard won insights to peer through the present and into the future By rendering often opaque environmental science in lucid prose the book explains how climate change and changing world orders will shape the life opportunities for younger generations born at the start of this century during the coming decades that will serve as the signposts of their lives 2030 2050 2070 and beyond **Congressional Quarterly Weekly Report** ,1995 How China is
