The Distressed Body Drew Leder,2016-10-17 Bodily pain and distress come in many forms They can well up from within at times of serious illness but the body can also be subjected to harsh treatment from outside The medical system is often cold and depersonalized and much worse are conditions experienced by prisoners in our age of mass incarceration and by animals trapped in our factory farms In this pioneering book Drew Leder offers bold new ways to rethink how we create and treat distress clearing the way for more humane social practices Leder draws on literary examples clinical and philosophical sources his medical training and his own struggle with chronic pain He levies a challenge to the capitalist and Cartesian models that rule modern medicine Similarly he looks at the root paradigms of our penitentiary and factory farm systems and the way these produce distressed bodies asking how such institutions can be reformed Writing with coauthors ranging from a prominent cardiologist to long term inmates he explores alternative environments that can better humanize even spiritualize the way we treat one another offering a very different vision of medical criminal justice and food systems Ultimately Leder proposes not just new answers to important bioethical questions but new ways of questioning accepted concepts and practices

Grace and Gravity Lars Spuybroek,2020-11-26 How do we live well The first sentence of Grace and Gravity raises the fundamental question that constantly occupies our minds and of all those who lived before us Paradoxically the impossibility of answering this question opens up the very room needed to find ways of living well It is the gap where all disciplines fall short where architecture does not fit its inhabitants where economy is not based on shortage where religion cannot be explained by its followers and where technology works far beyond its own principles According to Lars Spuybroek the prize winning former architect this marks the point where the paradoxical machine of grace reveals its powers a point where we cannot say if we are moving or being moved Following the trail of grace leads him to a new form of analysis that transcends the age old opposition between appearances and technology Linking up a dazzling and often delightful variety of sources monkeys paintings lamp posts octopuses tattoos bleeding fingers rose windows robots smart phones spirits saints and fossils with profound meditations on living death consciousness and existence Grace and Gravity offers an eye opening provocation to a wide range of art historians architects theologians anthropologists artists media theorists and philosophers
