

# Simplifying Expressions

**Simplifying expressions** involves using the properties of operations to create equivalent algebraic expressions.

 **Example** Simplify  $4(x + 7)$

This means '4 times the sum of  $x$  and 7.'

| Repeated addition                                                                                                                                    | Box method                                                                                                                                                                                                          | Distributive property                                                                                                                                                                                     |
