Teaching the Gifted and Talented in the Mathematics Classroom Kevin G. Bartkovich, William C. George, 1980 As part of the Educating Gifted and Talented Students series the booklet offers strategies for teaching mathematics to gifted and talented students Methods for identifying mathematical ability are reviewed and a two stage method of identification is highlighted which involves screening students in an already chosen grade through two different measures of mathematical aptitude General approaches are considered including enrichment busy work general academic enrichment and cultural enrichment specific academic enrichment and educational acceleration Detailed are procedures for implementing teaching strategies fast paced mathematics class and individualized classroom approach found successful in the Study of Mathematically Precocious Youth Also addressed are program evaluation teacher selection textbook selection and other accelerative options SBH *Resources in Education*, 1994 New Approaches To Measurement And Evaluation K.S. Sidhu, 2005 Computers and Their Impact on State Assessments Robert W. Lissitz, Hong Jiao, 2012-05-01 The Race To The Top program strongly advocates the use of computer technology in assessments It dramatically promotes computer based testing linear or adaptive in K 12 state assessment programs Moreover assessment requirements driven by this federal initiative exponentially increase the complexity in assessment design and test development This book provides readers with a review of the history and basics of computer based tests It also offers a macro perspective for designing such assessment systems in the K 12 setting as well as a micro perspective on new challenges such as innovative items scoring of such items cognitive diagnosis and vertical scaling for growth modeling and value added approaches to assessment The editors goal is to provide readers with necessary information to create a smarter computer based testing system by following the advice and experience of experts from education as well as other industries This book is based on a conference <http://marces.org/workshop.htm> held by the Maryland Assessment Research Center for Education Success It presents multiple perspectives including test vendors and state departments of education in designing and implementing a computer based test in the K 12 setting The design and implementation of such a system requires deliberate planning and thorough considerations The advice and experiences

presented in this book serve as a guide to practitioners and as a good source of information for quality control. The technical issues discussed in this book are relatively new and unique to K-12 large-scale computer-based testing programs, especially due to the recent federal policy. Several chapters provide possible solutions to psychometricians dealing with the technical challenges related to innovative items, cognitive diagnosis, and growth modeling in computer-based linear or adaptive tests in the K-12 setting.
