book *Intensive Mathematics Interventions* provides a thorough background knowledge about mathematics difficulties across the grade span. Even more valuable to educators, this book provides user-friendly guidance on how to address all of the elements of mathematics difficulties from preschool to secondary grades. Each topic provides clear guidance to support decision making about intensive instruction, including examples, ideas, practices, and suggestions. You will learn about the characteristics of students with math difficulties, how to use data to progress monitor them, how to intensify interventions, specific evidence-based practices for addressing early numeracy, time and money, whole numbers, rational numbers, word problem solving strategies, algebra, and even technology.

The Best of Corwin: Differentiated Instruction in Literacy, Math, and Science Leslie Laud, 2011-09-28. Content-specific DI guidance from the best minds in education. The Best of Corwin series showcases key chapters from critically acclaimed Corwin publications for a powerful compilation of perspectives on important education issues and topics. In this collection, current research on the most effective differentiation practices for teaching students at all levels of proficiency in literacy, mathematics, and science is brought alive through the many strategies and classroom examples from prominent authors. Topics covered include Reading and writing: A comprehensive array of models for differentiating reading instruction; an approach to gradual release of responsibility to accelerate progress; and multi-tiered writing instruction. Mathematics: Support for both low and high achieving students, including interventions and challenges, and the implementation of RTI in math instruction. Science: Models and methods for increasing student achievement through differentiated science inquiry. From the differentiation of content to the differentiation of instructional methods to the pacing of material to meet different students' needs, everything you need to begin and master differentiated instruction is right here.

Response to Intervention in Math Paul J. Riccomini, Bradley S. Witzel, 2010. Provides educators with instructions on applying response to intervention (RTI) while teaching and planning curriculum for students with learning disabilities.

Math Stories For Problem Solving Success James L. Overholt, Nancy H. Aaberg, James Lindsey, 2008-03-07. This second edition of the popular math teaching resource book *Math Stories for Problem Solving Success* offers updated, true-to-life situations designed to motivate teenagers to use math skills for solving everyday problems. The book features intriguing short stories followed by sets of problems related to the stories that are correlated to the standards of the National Council of Teachers of Mathematics. Each of the easy-to-read stories is followed by three increasingly difficult groups of problem sets. This makes it simple for teachers to select the appropriate problem set for students of different abilities and at different grade levels. To further enhance student involvement, the stories feature recurring characters and can be used either sequentially or out of order. The problems in the book cover many basic math topics, including decimals, fractions, and percents, measurement, geometry, data, statistics, and probability, algebra, and problem solving. In addition to having all the answers, an Answer Key at the end of the book offers explanations and background information about the problems that can be helpful to both teachers and students. *Math Stories for Problem Solving Success*
