Abel Boyer, 1881 *Swann's Way (International Student Edition) (Norton Critical Editions)* Marcel Proust, 2016-04-04 In its centennial year, Marcel Proust's masterpiece of literary imagination is available in a Norton Critical Edition. Marcel Proust's seven-volume masterpiece, *In Search of Lost Time: À la recherche du temps perdu*, has inspired many superlatives among them: the greatest novel ever written and the greatest novel of the first half of the twentieth century. *Swann's Way*, the first volume of the *Recherche* and the most widely read and taught of all the volumes, is the ideal introduction to Proust's inventive genius. This Norton Critical Edition is based on C. K. Scott Moncrieff's translation, which introduced the English-speaking world to Proust and was published during the author's lifetime. It is accompanied by Susanna Lee's introduction, note on the text, and explanatory annotations. Marcel Proust was forty-two years old when *Swann's Way* was published, but its foundational ideas and general shape had been evolving for decades. Contexts includes a 1912 reader's report of the manuscript that exemplifies publishers' complicated reactions to Proust's new form of writing. Also included are three important post-publication reviews of the novel by Elie Joseph, Bois-Lucien Daudet, and Paul Souday, as well as André Arnyvelde's 1913 interview with Proust. The fourteen critical essays and interpretations of *Swann's Way* in this volume speak to the novel's many facets: from the musical to the artistic, to its representations of Judaism and homosexuality. Contributors include Gérard Genette, whose *Metonymy* in Proust appears here in English translation for the first time, along with Gilles Deleuze, Roger Shattuck, Claudia Brodsky, Julia Kristeva, Margaret E. Gray, and Alain de Botton, among others. The edition also includes a Chronology of Proust's Life and Work, a Selected Chronology of French Literature from 1870 to 1929, and a Selected Bibliography. **Chronicles of the**

Fichte, 2005-11-17 Fichte's *System of Ethics*, published in 1798, is at once the most accessible presentation of its author's comprehensive philosophical project, *The Science of Knowledge* or *Wissenschaftslehre*, and the most important work in moral philosophy written between Kant and Hegel. Fichte's ethics integrates the discussion of our moral duties into the systematic framework of a transcendental theory of the human subject. Its major philosophical themes include the practical nature of self-consciousness, the relation between reason and volition, the essential role of the drives in human willing, the possibility of changing the natural world, the reality of one's own body, the reality of other human beings, and the practical necessity of social relations between human beings. This volume offers a translation of the work together with an introduction that sets it
