Worshippers of the Gods Mattias P. Gassman, 2020 Worshippers of the Gods shows how fourth century Latin writers rethought traditional religion during Christianity s rise Through five interlocking studies of inscriptions laws senatorial papers and Christian polemics it traces shifting conceptions of paganism from the Tetrarchic persecution through Constantine s reign to the disestablishment of the Roman cults in the 380s Conversations and Controversies in the Scientific Study of Religion , 2016-02-15 Luther H Martin and Donald Wiebe together have spent the better part of a century exploring possibilities for a scientific study of religion The following essays are a record of their conversations together and

of their conversations and controversies with a number of leading scholars in religious studies that address that possibility As with any scientific endeavor knowledge advances when research assumptions and experimental designs are collegially discussed and critically assessed It is hoped that these essays might provide the occasion for scholars in the field to discuss the theoretical and methodological issues they have raised to debate and expand upon them or in the spirit of forthright scientific inquiry to refute the arguments they have made Bollettino dei Musei Comunali N.S.XXVI/2012

Controlling Contested Places Christine Shepardson,2019-05-14 From constructing new buildings to describing rival controlled areas as morally and physically dangerous leaders in late antiquity fundamentally shaped their physical environment and thus the events that unfolded within it Controlling Contested Places maps the city of Antioch Antakya

Turkey through the topographically sensitive vocabulary of cultural geography demonstrating the critical role played by physical and rhetorical spatial contests during the tumultuous fourth century. Paying close attention to the manipulation of physical places, Christine Shepardson exposes some of the powerful forces that structured the development of religious orthodoxy and orthopraxy in the late Roman Empire. Theological claims and political support were not the only significant factors in determining which Christian communities gained authority around the Empire. Rather, Antioch's urban and rural places far from being an inert backdrop against which events transpired, were ever shifting sites of and tools for the negotiation of power, authority and religious identity. This book traces the ways in which leaders like John Chrysostom, Theodoret and Libanius encouraged their audiences to modify their daily behaviors and transform their interpretation of the world and landscape around them. Shepardson argues that examples from Antioch were echoed around the Mediterranean world and similar types of physical and rhetorical manipulations continue to shape the politics of identity and perceptions of religious orthodoxy to this day.

Spaces in Late Antiquity Juliette Day, Raimo Hakola, Maijastina Kahlos, Ulla Tervahauta, 2016-05-26. Places and spaces are key factors in how individuals and groups construct their identities. Identity theories have emphasised that the construction of an identity does not follow abstract and universal processes but is also deeply rooted in specific historical, cultural, social and material environments. The essays in this volume explore how various groups in Late Antiquity rooted their identity in special places that were imbued with meanings derived from history and tradition. In Part I, essays explore the tension between the Classical heritage in public, especially urban spaces in the form of ancient artwork and civic celebrations and the Church's appropriation of that space through doctrinal disputes and rival public performances. Parts II and III investigate how particular locations expressed and formed the theological and social identities of Christian and Jewish groups by bringing together fresh insights from the archaeological and textual evidence. Together, the essays here demonstrate how the use and interpretation of shared spaces contributed to the self-identity of specific groups in Late Antiquity and in so doing, issued challenges and caused conflict with other social and religious groups.

Paradiso Lorenzo Castore, 2005. For Lorenzo Castore, in his dynamic photographs of Cuba and Mexico, colour is everything. He uses it in extraordinary ways, conveying a rich sense of place and atmosphere. The resultant images are revealing and powerful portraits of his subjects: cafés, bars, streets and the everyday. This is the winning project of the 2005 Leica European Publishers Award, whose previous winners include Simon Norfolk, Bruce Gilden, Dario Mittelli and Jeff Mermelstein. A worthy and fascinating addition to the list of previous winners, *Paradiso* is constantly surprising and striking.

Readings of the Centurion at Capernaum Christopher B. Zeichmann, 2022-10-28. The first ever monograph on the history of queer biblical interpretation of a controversial biblical passage. Since the 1950s, homoerotic readings of the pericope in which Jesus heals a Roman centurion's slave have been built upon three of the account's features: the specific Greek word

pais which can refer to youth slave or the junior partner in a sexual relationship between two men Luke's characterization of the young man as dear entimos to the centurion and commonplace homoeroticism in the Roman army Rather than affirming or denying the historical reality of a sexual relationship between the centurion and the young man Christopher B Zeichmann instead traces the shifting patterns of queer readings of the text and the influences of the sexual political and theological discourses of late twentieth and early twenty first century Europe the United States and Australia Readers will see how distinct political contexts have led interpreters to find very different meanings about the sexual subtexts of this story

Friesen, 2015-07-17 Courtney J P Friesen explores shifting boundaries of ancient religions by way of the reception of a popular tragedy Euripides Bacchae As a play staging political crises provoked by the arrival of the foreign god Dionysus and his ecstatic cult audiences and readers found resonances with their own cultural moments This dramatic deity became emblematic of exuberant and liberating spirituality and at the same time a symbol of imperial conquest Thus readings of the Bacchae frequently foreground conflicts between religious autonomy and political authority and between ethnic diversity and social cohesion

This cross disciplinary study traces appropriations and evocations of this drama ranging from the fifth century BCE through Byzantium not only among pagans but also Jews and Christians Writers variously articulated their religious visions over against Dionysus often while paradoxically adopting the god's language and symbols Consequently imitation and emulation are at times indistinguishable from polemics and subversion
