Animal Diorama Pictures:

Instant Habitat Dioramas Donald M. Silver, Patricia J. Wynne, 2001 This guide to making dioramas 3 D paper models includes easy step by step instructions for 12 models of familiar habitats and the animals that live in them companion observation sheets that teach about polar regions rain forest oceans and more Illustrations Hybrid Photography Sara Hillnhuetter, Stefanie Klamm, Friedrich Tietjen, 2021-04-07 This book explores the territories where manual graphic photographic and digital techniques interfere and interlace in sciences and humanities It operates on the assumption that when photography was introduced it did not oust other methods of image production but rather became part of ever more specialized and sophisticated technologies of representation The epistemological break commonly set with the advent of photography since the nineteenth century has probably been triggered by photographic techniques but certainly owes much to the availability of a plethora of hybrid media media that influence the relation of sciences humanities and their methods and subjects This book will be of interest to scholars in art and visual culture photography and history of photography

Perfect Pairs, K-2 Melissa Stewart, Nancy Chesley, 2023-10-10 Hands on lessons can be fun and compelling but when it comes to life science they aren't always possible practical effective or safe Children can't follow a lion as it stalks a gazelle visit the exotic kapok tree in a rain forest or swim alongside the underwater life in a pond But they can explore a whole world of animals plants and ecosystems through the pages of beautifully illustrated science themed picture books Perfect Pairs which marries fiction and nonfiction picture books focused on life science helps educators think about and teach life science in a whole new way Each of the twenty two lessons in this book is built around a pair of books that introduces a critical life science concept and guides students through an inquiry based investigative process to explore that idea from animal environment interactions to the role of structure in plant and animal survival from inheritance of traits to variation of species Each lesson starts with a Wonder Statement and comprises three stages Engaging Students features a hands on activity that captures student interest uncovers current thinking and generates vocabulary The heart of the investigative process Exploring with Students spotlights the paired books as the teacher reads aloud and helps students find and organize information into data tables Encouraging Students to Draw Conclusions shows students how to review and analyze the information they have collected Bringing high quality science themed picture books into the classroom engages a broad range of students addresses the Performance Expectations outlined in the Next Generation Science Standards and supports the goals of the Common Core State Standards for English Language Arts Even if you are science shy Perfect Pairs can help you become a more confident teacher whose classroom buzzes with curious students eager to explore their natural world

Stuffed Animals and Pickled Heads Stephen T. Asma, 2003-05-01 The natural history museum is a place where the line between high and low culture effectively vanishes where our awe of nature our taste for the bizarre and our thirst for knowledge all blend happily together But as Stephen Asma shows in *Stuffed Animals and Pickled Heads* there is more going on in these great institutions than just smart fun Asma takes us on a wide ranging tour of natural history museums in New York and Chicago London and Paris interviewing curators scientists and exhibit designers and providing a wealth of fascinating observations We learn how the first museums were little more than high toned side shows with such garish exhibits as the pickled head of Peter the Great's lover In contrast today's museums are hot beds of serious science funding major research in such fields as anthropology and archaeology Rich in detail lucid explanation telling anecdotes and fascinating characters Asma has rendered a fascinating and credible account of how natural history museums are conceived and presented It's the kind of book that will not only engage a wide and diverse readership but it should best of all send them flocking to see how we look at nature and ourselves in those fabulous legacies of the curiosity cabinet The Boston Herald
