Mark Scheme *2005 examination – June series*

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding

Animal Welfare Science, Husbandry and Ethics: The Evolving Story of Our Relationship with Farm Animals

Mark Fisher, 2018-12-14 Animal Welfare has been a subject of intellectual and academic study for a long time. In the past, philosophers, thought leaders, and scientists have contributed to the debate and seismic changes such as the advent of post-war industrial farming have brought about changes in attitudes to the way animals are farmed. Animal welfare as a science and philosophy can be understood as a trajectory through history of our understanding of our relationship with animals enhanced in recent years through studies into animal behaviour and cognition and societal changes in the way we view animals. Animal Welfare Science, Husbandry and Ethics charts the history of our understanding of farm animal welfare throughout time, the human use of animals in different eras, and farming in different systems, seeing the emergence of intensification and science and technology. The book examines the human-non-human animal relationship with a philosophical approach, examining the connections and disconnections between animals and people, and charts the beliefs and motives of different philosophers, theories, and movements in animal welfare from early history to the present. The book also looks at our current animal welfare systems, examining what is working and what is not, the pathway to how we got here, and looks at future considerations for animal welfare, putting forward the author's thoughts on achieving a sustainable animal welfare model. Intended for animal welfare students, teachers, researchers, and academic libraries, Animal Welfare Science, Husbandry and Ethics introduces a complex subject requiring an understanding of the underlying factors and drivers of human behaviour and farming systems. Only by acknowledging the complexity and understanding the factors contributing to that complexity can we hope to develop an equitable and sustainable animal welfare for the future.
