less risk there are two passive buy and hold strategies Those wanting to commit a little more effort and take on higher risk with the potential for higher rewards can use a proven system to time when to invest in the stock market and when to hold funds as cash The most advanced strategies which carry higher short term risk with the potential to achieve spectacular long term returns make use of the gearing offered by spread trading Each strategy has a set of clear and simple instructions plus there are historic performance tables and the expectations for future returns Unique features of this innovative book include How to construct a spreadsheet to produce a valuation of the FTSE 100 and the expected returns from a five year investment in the index These valuations constitute buy sell signals which have delivered a profit for every historic period in the market How to extend the spreadsheet to calculate post tax returns tailored to your own tax circumstances A Market Momentum System that uses simple moving averages to signal when you should exit the market to minimise the impact of major market crashes 30 year track records for all the investment strategies A system for creating a synthetic tax free FTSE 100 tracker using FTSE 100 spread trades A FTSE 100 spread trading simulator that enables you to test the historic returns you would have achieved according to your appetite for short term risk At the highest level of short term risk 1 000 would have grown to more than 12 300 000 over 30 years with all of the gains being tax free Leaving your cash in a deposit account could see its real value whittled away by poor interest rates and inflation If you are looking for a way to grow your money significantly over time by following a straightforward investment plan then this book shows you how

Datapro Directory of Microcomputer Software, 1998 **DIY Guide in customising Staff Annual Leave Planner & Roster using Google Sheets** Singson Kwan, **DIY Guide in Customising Staff Annual Leave Planner and Roster Using Google Sheets** Singson Kwan, 2017-01-18 What are the aims of this guide This guide aims to provide a cost effective method to customise a leave planner and roster so that both manager and staff have a high visibility or transparency of leave availability even before and during leave projection stages The following are the salient features of the planner Staff can project his leave and makes changes anytime and anywhere using computer or smartphone It shows real time changes made by other team members simultaneously even while in the process of any editing that might be going on Staff can have a good overview in terms of the leave availability on different dates Entire staff team are able to view the planner at any given time however the editing of the cells and rows feature will be disabled unless given edit permission Manager can review the editing history made by all staff Manager can set up alert to auto highlight leave clashes Manager can freeze certain portion of the planner once staff projection period ends Who is this guide aimed at This guide is designed for managers or team leaders who are assigned to take charge of staff leave planning and approval duties By integrating information technology and human psychology this book helps people managers create a shared leave projection platform for advanced leave planning for the team colleagues As good people manager we always aim at achieving a win win situation ensuring smooth running of the operational unit as well as meeting staff personal needs in terms of leave taking Through years of observation I came to realise leave clashing

among staff is one of the key operational problems which creates negative impact on working relationship among team members A lot of time has been spent on handling and tackling leave related issues which indirectly affects the overall productivity I have been studying and searching both intensively and extensively for a cost effective way to facilitate the handling management of staff leave projection and allocation However most off the shelf human resource or roster planning software are usually catered for local computer installation requirement Most are not fully transparent in the sense that they are designed for manager use instead of providing online shared access for other staff Lacking in flexibility of customization ready made software s is also unlikely to suit the actual need of your unit In addition the cost of the afore mentioned software s could prove to be too exorbitant for a small department in terms of justifying budget planning All these pre existent issues and shortcomings have inspired me to find a solution thus developing a DIY system to help managers departmental heads or anyone involved in tackling this managerial challenge became my utmost priority In the following chapters I will walk you through the steps in how to create an online leave planner which can be made accessible by members of your staff I hope you will find this book purposive concise and practical in bringing in benefits to you and your team
