The Layperson's Guide to Exercise, Diet & Supplements Daniel J. Shamy,2013-04 We instinctively know that exercise eating the right things and taking vitamins sustains our health maintains our youth and offers a sense of wellbeing Traditional fitness publications do a great job telling you what to do but lack any explanation as to the why and how They offer a map to youth by micromanaging your diet exercise and or supplements You blindly follow their lead in expectation of finding your fountain of youth through their

training Every body is different which is why one map may work for one person but not another maybe it failed you so you try another What you may not realize is that although they offer step by step instruction to find the fountain they are not teaching you how to read the map Although the map is the same the directions are different for each of us to find the fountain of youth The difference between the layperson and expert is their ability to read the map as a whole that map is our anatomy That cartography lesson is learned by teaching you how exercise diet and supplements work rather than being told what in the same to follow At the end of the lesson you may now understand that your journey may require parts of many methods rather than the single direction of one The author shares his own journey as he teaches you how to read the map so you understand how one has successfully read the map to discover his fountain of youth

Drugs, Alcohol and Sport Paul Dimeo,2013-09-13 The use of alcohol and drugs seems contradictory to the popular ideal of sport as a healthy moral and physical pursuit and yet it has been present in sports culture since clubs first became the focus for competitive games and social gatherings Charting the changing patterns of the use of drugs and alcohol since the nineteenth century this is a critical history that relates substance consumption and regulation to social relations of power sports men and women almost revelling in their deviance and leaving the moral agonising to their supposed superiors In addition certain substances have become at various times the focus of heightened controversy raising questions about the symbolism of the body in sport its uses and behaviours and associated perceptions These questions are tackled here in a lively discussion on the social construction of drug and alcohol use ideal as a catalyst for debate or as an informed introduction to the hottest topic in sport today This book was previously published as a special issue of Sport in History

Bodybuilding, Drugs and Risk Lee Monaghan,2002-01-04 Current popular interest in bodies fitness sport and active lifestyles has made bodybuilding more visible and acceptable within mainstream society than ever before However the association between bodybuilding drugs and risk has contributed to a negative image of an activity which many people find puzzling Using data obtained from participant observation and interviews this book explores bodybuilding subculture from the perspective of the bodybuilder It looks at How bodybuilders try to maintain competent social identities How they manage the risks of using steroids and other physique enhancing drugs How they understand the alleged steroid violence link How they see the muscular body Through systematic exploration it becomes apparent that previous attempts to explain bodybuilding in terms of masculinity in crisis or gender insecurity are open to question Different and valuable insights into what sustains and legitimizes potentially dangerous drug taking activities are provided by this detailed picture of a huge underground subculture
