Medienerziehung geleistet da die Sch ler lernen kritisch mit Medien umzugehen Im Alltag dienen Musikvideoclips meist nur
zur Unterhaltung Dabei lernen die Sch ler aber nicht die Botschaft dieses Mediums zu hinterfragen Sie sollen folglich zur
bewussten Rezeption von Musikvideoclips erzogen werden Ferner eignen sich Musikvideos gut zur Vermittlung
landeskundlicher Informationen und interkultureller Gesichtspunkte Sie stellen die Kultur des jeweiligen Landes oft in
authentischer Weise dar wodurch die Sch ler einen guten Einblick in die englischsprachige Welt erhalten *The British

Temperley, 2004-08-20 In this book David Temperley addresses a fundamental question about music cognition how do we
extract basic kinds of musical information such as meter phrase structure counterpoint pitch spelling harmony and key from
music as we hear it Taking a computational approach Temperley develops models for generating these aspects of musical

structure The models he proposes are based on preference rules which are criteria for evaluating a possible structural analysis of a piece of music A preference rule system evaluates many possible interpretations and chooses the one that best satisfies the rules After an introductory chapter Temperley presents preference rule systems for generating six basic kinds of musical structure meter phrase structure contrapuntal structure harmony and key as well as pitch spelling the labeling of pitch events with spellings such as A flat or G sharp He suggests that preference rule systems not only show how musical structures are inferred but also shed light on other aspects of music He substantiates this claim with discussions of musical ambiguity retrospective revision expectation and music outside the Western canon rock and traditional African music He proposes a framework for the description of musical styles based on preference rule systems and explores the relevance of preference rule systems to higher level aspects of music such as musical schemata narrative and drama and musical tension

The Musical Language of Rock David Temperley, 2018 In all of the books about rock music relatively few focus on the purely musical dimensions of the style dimensions of harmony and melody tonality and scale rhythm and meter phrase structure and form and emotional expression *The Musical Language of Rock* puts forth a new comprehensive theoretical framework for the study of rock music by addressing each of these aspects Eastman music theorist and cognition researcher David Temperley brings together a conventional music analytic approach with statistical corpus analysis to offer an innovative and insightful approach to the genre With examples from across a broadly defined rock idiom encompassing everything from the Beatles to Deep Purple Michael Jackson to Bonnie Raitt *The Musical Language of Rock* shows how rock musicians exploit musical parameters to achieve aesthetic and expressive goals for example the manipulation of expectation and surprise the communication of such oppositions as continuity closure and tension relaxation and the expression of

emotional states A major innovation of the book is a three dimensional model of musical expression representing valence energy and tension which proves to be a powerful tool for characterizing songs and also for tracing expressive shifts within them The book includes many musical examples with sound clips available on the book s website The Musical Language of Rock presents new insights on the powerful musical mechanisms which have made rock a hallmark of our contemporary musical landscape

Spectatorship Roxanne Samer, William Whittington, 2017-10-25 Media platforms continually evolve but the issues surrounding media representations of gender and sexuality have persisted across decades Spectator The University of Southern California Journal of Film and Television Criticism has published groundbreaking articles on gender and sexuality including some that have become canonical in film studies since the journal s founding in 1982 This anthology collects seventeen key articles that will enable readers to revisit foundational concerns about gender in media and discover models of analysis that can be applied to the changing media world today Spectatorship begins with articles that consider issues of spectatorship in film and television content and audience reception noting how media studies has expanded as a field and demonstrating how theories of gender and sexuality have adapted to new media platforms Subsequent articles show how new theories emerged from that initial scholarship helping to develop the fields of fandom transmedia and queer theory The most recent work in this volume is particularly timely as the distinctions between media producers and media spectators grow more fluid and as the transformation of media structures and platforms prompts new understandings of gender sexuality and identification Connecting contemporary approaches to media with critical conversations of the past Spectatorship thus offers important points of historical and critical departure for discussion in both the classroom and the field
