Analyse Spatiale Les Localisations Géographie:

L'analyse spatiale Denise Pumain, Thérèse Saint-Julien, 2004 L'analyse spatiale s'appuie sur un ensemble de concepts et de méthodes qui aident à penser l'aménagement de la surface de la terre par les sociétés humaines. Ce manuel s'adresse à tous ceux qui cherchent à comprendre en quoi le changement des situations géographiques exprime l'évolution des rapports des sociétés à leur espace et leurs territoires. En cours d'intégration dans les systèmes d'information géographique, les outils de l'analyse spatiale font désormais partie de la culture de base de tout géographe et plus largement de tout praticien des questions territoriales. Cet ouvrage explique les concepts et les outils spatiaux fondamentaux pour l'étude des localisations, repérage et représentation des objets géographiques, description de leurs localisations, méthode d'étude de la morphologie des réseaux et de construction de régions homogènes.

Analyse spatiale de l'information géographique Régis Caloz, Claude Collet, 2011-01-01 Les systèmes d'information géographique SIG caractérisent la fois un modèle numérique de l'espace géographique mais aussi l'ensemble des outils de traitement de l'information associés. Combinant informations géographiques et statistiques, ils permettent un suivi cartographique et quantitatif des dynamiques territoriales. La plupart des collectivités publiques ont aujourd'hui achevé l'acquisition et la structuration de ce type de données. Les bases résultantes sont mises à disposition du public et des praticiens, mais la richesse et la diversité des informations qu'elles proposent rendent leur exploitation complexe. Dans la mesure où elles requièrent des connaissances développées en analyse spatiale, cet ouvrage se propose de procurer au lecteur l'ensemble des outils nécessaires à la maîtrise et à l'exploitation de ces méthodes, notamment dans le cadre de la géostatistique appliquée aux phénomènes discrets et continus. De l'analyse du relief à la formulation de requêtes spatiales, des aptitudes des réseaux, de l'accessibilité et des zones d'influence, et des objets zonaux, l'analyse multivariée associe l'aide à la décision de la dynamique spatiale ou de la propagation des incertitudes. Manuel sans équivalent couvrant l'ensemble du domaine de l'exploitation des informations spatiales et de leur analyse dans une perspective d'aide à la décision. Trois niveaux de lecture : bases, compréhension scientifique des phénomènes, méthodes opérationnelles. Nombreuses questions de révision et suggestions de lecture en fin de chaque chapitre. Clair et didactique, cet ouvrage s'adresse à un large public d'étudiants en géosciences et en sciences de l'environnement, mais aussi à des géographes et d'ingénieurs praticiens. La recherche d'un ouvrage de référence. 4e de couverture.

Universal Ontology of Geographic Space: Semantic Enrichment for Spatial Data Podobnikar, Tomaž, Čeh, Marjan, 2012-03-31 A universal approach to the ontology of geographic space has already been and is going to be a comprehensive task for establishing more effective spatial models. The concept of a universal spatial ontology should be independent of location, culture, and time. It should be fundamental and universal in the same way that the

number p defines the ratio between the diameter and the circumference of a circle The term universal therefore means all embracing and for general propose Universal Ontology of Geographic Space Semantic Enrichment for Spatial Data aims to escalate the current scope of research to support the development of semantically interoperable systems of geographic space This reference will aid university lecturers and professors students researchers developers of spatial applications

Epidemiology and Geography Marc Souris, 2019-05-21 Localization is involved everywhere in epidemiology health phenomena often involve spatial relationships among individuals and risk factors related to geography and environment Therefore the use of localization in the analysis and comprehension of health phenomena is essential This book describes the objectives principles methods and tools of spatial analysis and geographic information systems applied to the field of health and more specifically to the study of the spatial distribution of disease and health environment relationships It is a practical introduction to spatial and spatio temporal analysis for epidemiology and health geography and takes an educational approach illustrated with real world examples Epidemiology and Geography presents a complete and straightforward overview of the use of spatial analysis in epidemiology for students public health professionals epidemiologists health geographers and specialists in health environment studies Models in Spatial Analysis Lena Sanders, 2013-03-01 This title provides a broad overview of the different types of models used in advanced spatial analysis The models concern spatial organization location factors and spatial interaction patterns from both static and dynamic perspectives Each chapter gives a broad overview of the subject covering both theoretical developments and practical applications The advantages of an interdisciplinary approach are illustrated in the way that the viewpoint of each of the individual disciplines are brought together when considering questions relevant to spatial analysis The authors of the chapters come from a range of different disciplines geography economy hydrology ecology etc and are specialists in their field They use a range of methods and modeling tools developed in mathematics statistics artificial intelligence and physics Espace et localisation : la redécouverte de l'espace dans la pensée scientifique de langue française Jean H. Regional Airports M. N. Postorino, 2011 Regional Airports have become increasingly important elements of the air network system both as feeders of hub and spoke services and as origins or destination of point to point services Congestion at the main hubs and increasing demand for air transportation both for passengers and freight services necessitates revaluation of the overall air systems with regional airports taking an ever expanding role Optimisation of air transportation systems within the framework of other forms of transport plays an important part in the present quest for sustainability Congestion nowadays is not only associated with countries such as the USA and those in the EU but also a variety of other countries with fast developing economies where there is a strong increase in air transportation demand The revolution of the existing airport system including regional airports requires the developing of new optimisation tools which can simulate the whole process and produce optimal solutions These models are also essential to predict future demands and in particular the role that regional airports will play The siting of new airports involves taking into consideration a variety of environmental ecological social and economic factors which transcend the problem of transportation resources optimisation itself Regional Airports can be a powerful driving force behind the

development of an area and conversely can result in major problems if they are wrongly sited Horizons géographiques
Mark Bassin, Georges Benko, 2004 La 4e de couv indique La géographie n'est pas un long fleuve tranquille Les auteurs de cet ouvrage qui comptent parmi les scientifiques les plus reconnus à l'échelle internationale nous racontent comment la pensée s'est construite dans chacun des champs majeurs de la géographie humaine Issus des mondes francophones et anglophones ils nous montrent que les horizons géographiques sont multiples et que ceux-ci communiquent Ce livre traite de l'histoire récente et de l'épistémologie de la géographie Refusant de réduire la géographie à l'une de ses écoles ils portent un regard réflexif diversifié sur une discipline qui s'assume aujourd'hui comme science sociale et revendique la pluralité de ses approches Par la mise en perspective qu'il opère cet ouvrage permet de mieux comprendre les débats et les enjeux actuels de la géographie Il constitue ainsi une introduction à la géographie et ses mutations récentes *L'Espace géographique*, 1987
