Stephenson, PhD.,2014-10-17 One failing of many forensic science textbooks is the isolation of chapters into compartmentalized units This format prevents students from understanding the connection between material learned in previous chapters with that of the current chapter Using a unique format *A Hands On Introduction to Forensic Science Cracking the Case* approaches the topic of forensic science from a real life perspective

in a way that these vital connections are encouraged and established The book utilizes an ongoing fictional narrative throughout entertaining students as it provides hands on learning in order to crack the case As two investigators try to solve a missing persons case each succeeding chapter reveals new characters new information and new physical evidence to be processed A full range of topics are covered including processing the crime scene lifting prints trace and blood evidence DNA and mtDNA sequencing ballistics skeletal remains and court testimony Following the storyline students are introduced to the appropriate science necessary to process the physical evidence including math physics chemistry and biology The final element of each chapter includes a series of cost effective field tested lab activities that train students in processing analyzing and documenting the physical evidence revealed in the narrative Practical and realistic in its approach this book enables students to understand how forensic science operates in the real world

Laboratory Manual for Anatomy and Physiology Connie Allen, Valerie Harper, 2011-01-05 The Laboratory Manual for Anatomy and Physiology by Allen and Harper presents material in a clear and concise way It is very interactive and contains activities and experiments that enhance readers ability to both visualize anatomical structures and understand physiological topics Lab exercises are designed to require readers to first apply information they learned and then to critically evaluate it All lab exercises promote group learning and the variety offers learning experiences for all types of learners visual kinesthetic and auditory

Additionally the design of the lab exercises makes them easily adaptable for distance learning courses
