These books are the result of a conviction held by the editors authors and publisher that the time is appropriate for assembling in one place information about functions of the hippocampus derived from many varied lines of research Because of the explosion of research into the anatomy physiology chemistry and behavioral aspects of the hippocampus some means of synthesis of the results from these lines of research was called for We first thought of a conference In fact officials in the National Institute of Mental Health suggested we organize such a conference on the hippocampus but after a few tentative steps in this direction interest at the federal level waned probably due to the decreases in federal support for research in the basic health sciences so keenly felt in recent years However the editors also had come to the view that conferences are mainly valuable to the participants The broad range of students of all ages of brain behavior relations do not profit from conference proceedings unless the proceedings are subsequently published Furthermore conferences dealing with the functional character of organ systems approached from many points of view are most successful after participants have become acquainted with each other's work Therefore we believe that a book is the best format for disseminating information and that its publication can be the stimulus for many future conferences **Library Notes** University of North Carolina (1793-1962).
