A Theory of Syntax for Systemic Functional Linguistics Robin P. Fawcett,2000-01-01 This book describes and evaluates alternative approaches within Systemic Functional Linguistics SFL to representing the structure of language at the level of form It assumes no prior knowledge of SFL and can therefore be read as an introduction to current issues within the theory It will interest any linguist who takes a functional approach to understanding language Part 1 summarizes the major developments in the forty years of SFL s history including alternative approaches within Halliday s own writings and the emergence of the Cardiff Grammar as an alternative to the Sydney Grammar It questions the theoretical status of the multiple structure representations in Halliday s influential Introduction to Functional Grammar 1994 demonstrating that Halliday s model additionally needs an integrating syntax such as that described in Part 2 Part 2 specifies and discusses the set of categories and relationships that are needed in a theory of syntax for a modern computer implementable systemic functional grammar The theoretical concepts are exemplified at every point usually from English but occasionally from other languages The book is both a critique of Halliday s current theory of syntax and the presentation of an alternative version of SFL that is equally systemic and equally functional

Studies in Functional Discourse Grammar J. Lachlan Mackenzie,María de los Ángeles Gómez-González,2005 This book contains eight studies on Functional Discourse Grammar FDG with work by FDG s foremost proponents who provide both an introduction to the theory and a glimpse of current research projects FDG derives its name from taking the discourse act as the basic unit of linguistic analysis Each such unit receives four parallel analyses displaying its interpersonal representational morphosyntactic and phonological characteristics respectively What is striking about the emergence of FDG is that it enters into lively debate with various other contemporary frameworks that share its functionalist orientation This facet of FDG is highlighted in this book every chapter of which brings out the interconnectedness of current theoretical trends

Functional Descriptions Ruqaiya Hasan, Carmel Cloran, David Butt, 1996-01-01 This volume focuses on the relation between theory and description by examining aspects of transitivity in different languages Transitivity or case grammar to use the popular term has always occupied a centre stage position in linguistics not least because of its supposedly privileged relation to states of affairs in the real world Using a systemic functional perspective the ten papers in this volume make a contribution to this scholarship by focusing on the transitivity patterns in language as the expression of the experiential metafunction Through a study of different languages English Dutch German Finnish Chinese

and Pitjantjatjara the contributors provide functional descriptions of the various categories of process their participants and circumstances including phenomena such as di transitivity causativity the get passive etc With the relation between theories and descriptions running through the ten chapters of this volume as sometimes an overt and sometimes a covert theme the chapters point to the nature of the linguistic fact which is linked ineluctably on the one hand to the nature of the theory and on the other to the speakers experience of the world in which they live The majority of papers included in the volume derive from the 19th International Systemic Functional Congress at Macquarie University

abstract
Wherever we look we see language constituting the world not just reflecting it For instance the words for colours make a reality they don't just name things which are there the spectrum isn't divided into seven primary colours all the colours merge into one another According to structural linguistics by using language we are not reflecting a given reality but are rather construing one Systemic functional grammar developed by M A K Halliday states just this construal feature of language as well That language functions to make meanings and not to only refer to the outside world But furthermore elaborates on how a text makes those meanings It focuses therefore on the functional description of language The basic assumption is that language use is always functional people do not just talk or just write but rather any use of language serves a specific purpose namely to make meanings The primary concern of systemic functional linguistics can therefore be summed up under the questions How is language structured for use 3 How does it make meanings According to Halliday language makes meanings on three different levels simultaneously on the experiential level because it represents experience on the interpersonal level because language is used to interact with each other and on the textual level because we organize our message somehow This research paper will focus on the textual metafunction of language which is the theory of the clause being organized as a message The aim is to show that text itself construes the context by involving meaningful choices concerning what to put in thematic position and by means of cohesion Thus context is not only created through coherence i.e. the outside world

Word-order Variation in Isaiah 40-55 Michael Rosenbaum, 2018-07-17 What is the significance of word order variation in Isaiah 40-55 This work attempts to answer that question through the application of a functional linguistic model A model is outlined which is drawn primarily from Functional Grammar and a metalanguage is developed which also incorporates insights and terminology from Prague School linguistics and Discourse Analysis According to this model all languages develop a basic functional pattern into which constituents are placed in a consistent familiar order according to the function which those constituents serve in a discourse context Additionally languages develop special positions which can be used to mark constituents with certain functions Topic Theme Setting Focus Tail Vocative and Parenthetical A functional pattern the basic pattern plus the special positions is outlined for the language of verbal clauses in Isaiah 40-55 Also rules are written which describe the placement of constituents in the functional pattern Each of the functions outlined in the model and defined in the metalanguage is illustrated in the language of Isaiah 40-55 Finally there is a chapter which outlines the many defamiliar or poetic patterns found in Isaiah 40-55 due to the foregrounding of the language In conclusion it is observed that the order of constituents in the language of Isaiah 40-55 frequently does not emulate the basic functional pattern Two explanations are demonstrated for this phenomenon first Deutero Isaiah makes frequent use of special positions to mark certain functions and second the language of Isaiah 40-55 is foregrounded or poetic

interactants manage to exchange facts ideas views opinions beliefs emotion etc by using the linguistic systems and the resources they offer In interpersonal communication the fine tuning of individuals use of the linguistic resources is continuously probed The language used in interpersonal communication enhances social relations between interactants and keeps the interaction on the normal track When interaction gets off the track linguistic miscommunication may also destroy social relationships This volume is essentially concerned with this fine tuning in discourse and how it is achieved among various interactant groups The volume departs from the following fundamental questions How do interpersonal relations manifest themselves in language What is the role of language in developing and maintaining relationships in interpersonal communication What types of problems occur in interpersonal communication and what kind of strategies and means are used to solve them How does linguistically realized interpersonal communication interact with other semiotic modes Interpersonal communication is seen and researched from the perspective of what is being said or written and how it is realized in various generic forms The current research also gives attention to other semiotic modes which interact with the linguistic modes It is not just the social roles of interactants in groups the possible media available the non verbal behaviors the varying contextual frames for communication but primarily the actual linguistic manifestations that we need to focus upon when we want to have a full picture of what is going on in human interpersonal communication It is this linguistic perspective that the volume aims to present to all researchers interested in IC The volume offers an overview of the theories methods tools and resources of linguistically oriented approaches e g from the fields of linguistics social psychology sociology and semiotics for the purpose of integration and further development of the interests in IC Topics e g Orientation to interaction as primarily linguistically realized processes Expertise on theorizing and analyzing cultural and situational contexts where linguistic processes are realized Expertise on handling language corpora Expertise on theorizing and analyzing interaction types as genres Orientation to an integrated view of linguistic and non linguistic participant activities and of how interactants generate meanings and interact with space Expertise on researching the management of the linguistic flow in interaction and its successfulness
