Anatomy and Physiology Adapted International Edition E-Book Kevin T. Patton, Gary A. Thibodeau, Andrew Hutton, 2019-05-11. **ENT Made Easy** Linda MacConnell, Amtul Salam Sami, 2019-05-30. ENT Made Easy is the ideal clinical text for family physicians, physician assistants, ENT trainees, medical students, and other healthcare professionals looking to manage common ENT conditions. Diseases of the ears, nose, and throat are among the most common presentations in primary care, and many patients are referred to ENT clinics in secondary care for further medical and surgical management. To help reduce these referrals, this book guides readers through the basic anatomy and pathophysiology, and then for each presentation provides an introduction which describes possible causes and the history required, a section on diagnosis including which examinations and investigations to consider, management options, complications to look out for, and when to refer. This book offers concise practical guidance and so helps to fill the gap between ENT theory and the actual work experience. In addition to covering the common presentations from allergic rhinitis to vertigo, via dysphagia and halitosis, the book also provides a description of the main investigations and covers the particular problems occurring in pediatric cases. Publisher's note: this version of ENT Made Easy is an adaptation of the book of the same name by Amtul Salam Sami, ISBN 9781911510055, and is specifically intended for the US market. Not available in the UK/Europe.
