Introduction

Appraisal and feedback have a strong positive influence on teachers and their work. Teachers report that it increases their job satisfaction and, to some degree, their job security, and it significantly increases their development as teachers. The greater the emphasis on specific aspects of teacher appraisal and feedback, the greater the change in teachers' practices to improve their teaching. In some instances, more emphasis in school evaluations on certain aspects of teaching is linked to an emphasis on these aspects in teacher appraisal and feedback which, in turn, leads to further changes in teachers' reported teaching practices. In these instances, the framework for the evaluation of education appears to be operating effectively.

Identifying strengths and weaknesses, making informed resource allocation decisions, and motivating seasoned teachers to improve performance can help achieve policy objectives such as school improvement, school accountability and school choice. An opportunity therefore exists for policy makers and administrators to shape the framework of evaluation to raise performance and to target specific areas of school education. Appraisal and feedback had the least impact on teaching students in a multicultural setting which, as noted, was not an important criterion in the appraisal and feedback received by most teachers.

Performance Appraisal has a positive relationship with productivity (Doris Resella, 2011). Evrim Ustunluo, 2009; E.Deepa & S.Kuppusamy, 2014; Navaratne N. N. had a more broader approach as they concluded that it helps in defining roles and responsibilities more clearly, review and determine job descriptions, organizational goals and objectives, and lead to continuous learning, team building. Further researches has also found that performance appraisal has a positive and significant relationship with employee satisfaction (Dr. Saddam Hussain, 2011; Mahdiah Darehzereshki, 2013; Ismail, Mashkuri, Sulaiman, and Wong , 2011; Rabia
