In particular, the book examines China's modification to its laws and regulations, China's participation in WTO committee work and technical assistance programs available to China from the WTO, the US and other member nations. How effectively the WTO's first and second Transitional Review Mechanisms have operated. The US-China bilateral relationship and structures in place for discussion of US-China trade issues and major WTO compliance issues. The monitoring of China's WTO compliance by the US government and private sector groups as well as a survey of the important compliance issues that arose in the first two years of China's WTO membership. China's Banking Law and the National Treatment of Foreign-Funded Banks Wei Wang,2016-05-23 This book assesses new developments in and reform of China's banking law system following its accession to the WTO. It focuses on the relationship between GATS WTO national treatment obligations and China's banking law. Tracing the history of national treatment in China, the book compares the treatment of foreign-funded banks with the treatment of Chinese-funded banks and examines the structure and shortcomings of the existing banking law framework in China. Offering suggestions as to how the framework could be restructured and analysing the economic and political bases of an integrated banking law framework, the book argues that reorganization would bring about greater consistency with GATS WTO national treatment requirements. The book also explores the ambiguous definition of prudential carve-out, the subtle relationship between GATS national treatment and market access based on WTO cases, national treatment clauses in China's bilateral investment treaties and special treatment on banking in China's free trade agreements. This volume is a valuable resource for academics and students as well as professionals and policy makers working in the field of banking, WTO, Chinese law and foreign trade **Between Market Economy and State Capitalism** Henry Gao, Weihuan Zhou,2022-11-24 One major issue facing the world trading system today is how to deal with the challenge of China's state capitalism. Many commentators believe that the existing WTO

rules are insufficient and thus new rules are needed This book challenges this conventional wisdom Through meticulous studies and fresh analysis of the commitments in China s WTO accession package existing rules on state capitalism in WTO agreements and recent attempts to make new rules on these issues at the bilateral regional and multilateral levels this book argues that existing WTO rules especially those on subsidies coupled with China specific rules in its accession protocol do provide feasible tools to counter China s state capitalism This book also discusses the reasons for the lack of usage of these rules and provides concrete policy suggestions on how the rules may be better utilized as well as how to conduct constructive negotiations on new rules in the WTO and beyond
