CIS Index to U.S. Executive Branch Documents, 1910-1932 Congressional Information Service, 2001 *Mathematical Theory of Scattering Resonances* Semyon Dyatlov, Maciej Zworski, 2019-09-10 Scattering resonances generalize bound states eigenvalues for systems in which energy can scatter to infinity A typical resonance has a rate of oscillation just as a bound state does and a rate of decay Although the notion is intrinsically dynamical an elegant mathematical formulation comes from considering meromorphic continuations of Green s functions The poles of these meromorphic continuations capture physical information by identifying the rate of oscillation with the real part of a pole and the rate of decay with its imaginary part An example from mathematics is given by the zeros of the Riemann zeta function they are essentially the resonances of the Laplacian on the modular surface The Riemann hypothesis then states that the decay rates for the modular surface are all either or An example from physics is given by quasi normal modes of black holes which appear in long time asymptotics of gravitational waves This book concentrates mostly on the simplest case of scattering by compactly supported potentials but provides pointers to modern literature where more general cases are

studied It also presents a recent approach to the study of resonances on asymptotically hyperbolic manifolds The last two chapters are devoted to semiclassical methods in the study of resonances Current Index to Journals in Education ,1987

Constructing and Applying Objective Functions Andranik S. Tangian,Josef Gruber,2012-12-06 For some seven decades econometrics has been almost exclusively dealing with constructing and applying econometric equation systems which constitute constraints in econometric optimization models The second major component the scalarvalued objective function has only in recent years attracted more attention and some progress has been made This book is devoted to theories models and methods for constructing scalarvalued objective functions for econometric optimization models to their applications and to some related topics like historical issues about pioneering contributions by Ragnar Frisch and Jan Tinbergen **Title**
