Organizational Report Cards William T. Gormley Jr., David L. Weimer, 1999-03 In recent years consumers professional organizations government officials and third party payers have become increasingly concerned about how to assess the quality of the services provided by organizations in both the private and the public sectors One new approach is the organizational report card which compares the performance of organizations such as public schools colleges hospitals and HMOs This book offers the first comprehensive study of such instruments It discusses the circumstances under which they are desirable alternatives to other policy instruments such as regulation how they should be designed who is likely to use them and for what purpose and what role if any government should have in their creation Informed by cases

drawn from education health and other policy areas this book develops a conceptual framework for analyzing these issues It explores the tradeoffs in measuring performance the methods of communicating results effectively to mass and elite audiences and the ways in which organizations respond to the data gathered

Policy and Performance in American Higher Education Richard C. Richardson, Mario Martinez, 2009-06-15 This book examines how public policy influences institutional performance Public institutions of higher learning are called upon by state governments to provide educational access and opportunity for students Paradoxically the education policies enacted by state legislatures are often complex and costly to implement which can detract from that mission The authors evaluate the higher education systems of five states to explain how these policies are developed and how they affect the performance of individual institutions They identify the rules that are central to the coherence and performance of higher education systems that administrators apply to meet organizational goals within the constraints of changing sometimes conflicting federal and state policies
