**Child:** Toby      **Age:** 3 years and 3 months      **Date:** 2 March 2015  
**Educator:** Lorina      **Setting:** Sandpit      **Time:** 4:00pm

## Observation

Toby walked over to the sandpit and picked up a toy truck. Carrying the truck with both of his hands, Toby walked over to 2 of his friends who were also in the sandpit. Toby said "I got a dump truck, there is more over there, get one too" he said to the others, pointing to where the trucks were. Toby sat in the sandpit put the truck in front of him and used his hands he began to scoop up sand and fill the back of the truck. When Toby filled the back of the truck, he pushed it across the sandpit while kneeling. "Too heavy, hard to push" he commented. Toby stopped pushing and then began to empty the sand from the back of the truck. Once the sand was completely off the back of the truck, Toby pushed it across the sandpit again. "Look, I can push it fast now" he said.

## Interpretation

Through this experience it is evident that Toby explores the environment and manipulates objects and experiments with cause and effect, trial and error and motion. *Toby pushes the truck across the sandpit and says "Too heavy, hard to push". Then he empties sand from the back of the truck and pushes it across the sandpit again. "Look, I can push it fast now" Toby comments.*

## **Anecdotal Observations Of Children Examples:**

### **Foundations of Education: Instructional strategies for teaching children and youths with visual impairments**

M. Cay Holbrook, Alan J. Koenig, 2000      **Shaping Early Childhood: Learners, Curriculum and Contexts** Glenda Mac Naughton, 2003-12-16 This should be essential reading for anyone involved in the training and professional development of early years practitioners. It is an impressive analysis of the historical and contemporary big ideas that have influenced societies and practitioners' views of children and the nature of the curriculum. There are powerful sections on parents and communities. I particularly liked the stimulating ideas galleries with their statements from researchers, policy makers and practitioners around the world. *Nursery World* October 2004. This key textbook introduces students and practitioners to a wide range of different approaches to early childhood. It provides practical strategies for developing and implementing early learning experiences that promote excellence and equity for children. The book presents the latest research and thinking about good practice, discusses how various philosophies and beliefs influence decisions in early childhood education and identifies the key thinkers behind each approach. By examining different perspectives, the book helps early childhood practitioners to navigate their way through competing views, make informed choices and be critically reflective in their work. In an accessible, lively and user-friendly way, it explores issues such as: What constitutes an appropriate early childhood curriculum? How best to study and assess children? Involving parents and children in early childhood learning. The book features a range of pedagogical devices to inspire early childhood workers to reflect critically on their work and the ideas underpinning it, including: Boxed definitions of key terms; Ideas summary charts and ideas galleries; Clarification exercises; Case studies; Further reading lists. This essential textbook is ideal for students undertaking early childhood qualifications at degree level; Masters courses in early childhood education; and for practitioners who work with children from birth to eight in early childhood settings.

**Child Observation for Learning and Research** Theodora Papatheodorou, Paulette Luff, Janet Gill, 2013-12-19 *Child Observation for Learning and Research* is an exciting new text providing a thorough grounding in the methodology, practice and interpretation of observing children. The authors draw on their experience and expertise in childcare, education, social work and research to introduce the fundamental principles and process of observation, preparing you for your first observation and building knowledge and confidence through a wide range of scenarios and activities. The book takes the unique approach of demonstrating how acquiring observational skills can serve as a key learning tool, not only helping you to understand children but also to recognise, analyse and question theory, helping you make sense of your own learning.

**Students at Risk** Cheryll Duquette, 2013 This expanded and updated revision shows teachers how to deal with the different academic strengths and needs, learning styles, intelligences, interests and cultural backgrounds of all the students in their classrooms. *Students at Risk* also presents descriptions, symptoms and characteristics of various exceptionalities, including autism spectrum disorders, fetal alcohol spectrum disorder, mental health problems, learning

*Early Childhood Education* Petr G. Grotewell, Yanus R. Burton, 2008 This book focuses on early childhood education which spans the human life from birth to age 8 Infants and toddlers experience life more holistically than any other age group Social emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms that is often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child's first sense of self or the building of a first identity Because this is a crucial part of children's makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience
