

Animal rights

(opinion essay)

Some people believe that animals should be treated in the same way humans are and have similar rights, whereas others think that it is more important to use them as we desire, for food and medical research.

In my opinion, animal cruelty is an undeniable evil case, because like humans, animals need freedom too. Abusing animals means choosing to hurt them for no reason.

To begin with, people believe that the exploitation of animals is acceptable for several reasons. Firstly, they think that humans are the most important beings on the planet and everything must be done to ensure human survival. For instance, if a person beats an animal so badly that the animal happens to die nobody takes steps further so that someone is made responsible as people act when people are to suffer.

Secondly, it has been shown on numerous occasions by secret filming in laboratories, made by animal rights groups that animals feel as much pain as humans do, and they suffer when they are kept in cages for long periods. In addition, a substantial amount of animal research is done for cosmetics, to find cures for diseases, so this is unnecessary.

Thirdly, it has also been proved that humans can get all the nutrients and vitamins that they need from green vegetables and fruits. Therefore, again, having to kill animals for food is not an adequate argument.

To sum up, although some people argue killing animals for research and food is ethical, I would say there is sufficient evidence to demonstrate that this is not the case, and, therefore, steps must be taken to improve the rights of animals.
