## **Animal Man Book Origin Of The Species:**

Animal Man Grant Morrison, Doug Hazlewood, 2002 In this long awaited second collection of the groundbreaking series Animal Man questions become more and more troubling and the answers less and less clear p 4 of cover **Animal Man: Origin of the Species** Grant Morrison, 2002-08-13 The second collection of Grant Morrison's groundbreaking run on ANIMAL MAN reprints issues 10-17 plus the 19 page story from SECRET ORIGINS 39 this volume shows Animal Man moving more and more deeply into the cause of animal rights But something else is going on beyond his burgeoning radicalism Strange visions of aliens people disappearing into strange pencil like drawings and hints of a terrible Crisis lurk around the edges of reality Christianity Through the Centuries Earle E. Cairns, 2009-09-13 The third edition of Christianity Through the Centuries brings the reader up to date by discussing events and developments in the church into the 1990s This edition has been redesigned with new typography and greatly improved graphics to increase clarity accessibility and usefulness New chapters examine recent trends and developments expanding the last section from 2 chapters to 5 New photos Over 100 photos in all more than twice the number in the previous edition Single column format for greater readability and a contemporary look Improved maps 21 and charts 39 Building on the features that have made Christianity Through the Centuries an indispensable text the author not only explains the development of doctrines movements and institutions but also gives attention to the impact of Christianity on its times and to the mark of the times on Christianity *The Century Illustrated Monthly Magazine*, 1883 **Origins of Neuroscience** Stanley Finger, 2001 With over 350 illustrations this impressive volume traces the rich history of ideas about the functioning of the brain from its roots in the ancient cultures of Egypt Greece and Rome through the centuries into relatively modern times In contrast to biographically oriented accounts this book is unique in its emphasis on the functions of the brain and how they came to be associated with specific brain regions and systems Among the topics explored are vision hearing pain motor control sleep memory speech and various other facets of intellect The emphasis throughout is on presenting material in a very readable way while describing with scholarly acumen the historical evolution of the field in all its amazing wealth and detail From the opening introductory chapters to the concluding look at treatments and therapies this monumental work will captivate readers from cover to cover It will be valued as both an historical reference and as an exciting tale of scientific discovery It is bound to attract a wide readership among students and professionals in the neural sciences as well as general readers interested in the history of science and medicine *Canadian Naturalist and Geologist and Proceedings of the Natural History Society of Montreal*, 1860
