Giusti de Pérez, Ramon A. Pérez, 2008 Squatter developments house more than one third of the urban population in developing countries This work shows how geographic information systems GIS can be used to improve quality of life in poor urban areas Analyzing Urban Poverty Judy Baker, 2004 In recent years an extensive body of literature has emerged on the definition measurement and analysis of poverty Much of this literature focuses on analyzing poverty at the national level or spatial disaggregation by general categories of urban or rural areas with adjustments made for regional price differentials Yet for an individual city attempting to tackle the problems of urban poverty this level of aggregation is not sufficient for answering specific questions such as where the poor are located in the city whether there are differences between poor areas if access to services varies by subgroup whether specific programs are reaching the poorest and how to design effective poverty reduction programs and policies Answering these questions is critical particularly for large sprawling cities with highly diverse populations and growing problems of urban poverty Understanding urban poverty presents a set of issues distinct from general poverty analysis and thus may require additional tools and techniques Baker and Schuler summarize the main issues in conducting urban poverty analysis with a focus on presenting a sample of case studies from urban areas that were implemented by a number of different agencies using a range of analytical approaches for studying urban poverty Specific conclusions regarding design and analysis data timing cost and implementation issues are discussed This paper a product of the Urban Unit Transport and Urban Development Department is part of a larger effort in the department to promote strategies for reducing urban poverty World Bank web site **Urban Development - Challenges and Progress** Dr. Sukanta Sarkar, 2014

Urban Ecology Richard T. T. Forman, 2014-02-13 The first richly illustrated worldwide portrayal of urban ecology tying together organisms built structures and the physical environment around cities *Local Governance and Poverty in Developing Nations* Nicky Pouw, Isa Baud, 2013-06-17 This volume examines the persistence of poverty both rural and urban in developing countries and the response of local governments to the problem exploring the roles of governments NGOs and CSOs in national and sub national agenda setting policy making and poverty reduction strategies It brings together a rich variety of in depth country and international studies based on a combination of original data collection and extensive research experience in developing countries Taking a bottom up and multi dimensional perspective of poverty and well being as the starting point the authors develop a convincing set of arguments for putting the priorities of poor people first on any development agenda thus carving out an undisputable role for local governance in interplay with higher up governance actors and institutions *Open Cities | Open Data* Scott Hawken, Hoon Han, Chris Pettit, 2019-09-26 Today the world s

largest economies and corporations trade in data and its products to generate value in new disruptive markets Within these markets vast streams of data are often inaccessible or untapped and controlled by powerful monopolies Counter to this exclusive use of data is a promising world wide open data movement promoting freely accessible information to share reuse and redistribute The provision and application of open data has enormous potential to transform exclusive technocratic smart cities into inclusive and responsive open cities This book argues that those who contribute urban data should benefit from its production Like the city itself the information landscape is a public asset produced through collective effort attention and resources People produce data through their engagement with the city creating digital footprints through social media mobility applications and city sensors By opening up data there is potential to generate greater value by supporting unforeseen collaborations spontaneous urban innovations and solutions and improved decision making insights Yet achieving more open cities is made challenging by conflicting desires for urban anonymity sociability privacy and transparency This book engages with these issues through a variety of critical perspectives and presents strategies tools and case studies that enable this transformation

Geospatial Techniques in Urban Hazard and Disaster Analysis Pamela S. Showalter, Yongmei Lu, 2009-11-11 This book is the second in a series that examines how geographic information technologies GIT are being implemented to improve our understanding of a variety of hazard and disaster situations The main types of technologies covered under the umbrella of GIT as used in this volume are geographic information systems remote sensing not including ground penetrating or underwater systems and global positioning systems Our focus is on urban areas broadly defined in order to encompass rapidly growing and densely populated areas that may not be considered urban in the conventional sense The material presented here is also unabashedly applied our goal is to provide GIT tools to those seeking more efficient ways to respond to recover from mitigate prevent and or model hazard and disaster events in urban settings Therefore this book was created not only with our colleagues in the academic world in mind but also for hazards professionals and practitioners We also believe graduate students will find the material presented here of interest as may upper division undergraduate students

Advanced Studies in Energy Efficiency and Built Environment for Developing Countries Chaham Alalouch,Hassan Abdalla,Emmanuel Bozonnet,George Elvin,Oscar Carracedo,2019-05-21 This edited volume consists of three parts It is a culmination of selected research papers presented at the second version of the international conference on Improving Sustainability Concept in Developing Countries ISCDC and the second version of the international conference on Alternative and Renewable Energy Quest in Architecture and Urbanism AREQ organized by IEREK in Egypt 2017 It discusses major environmental issues and challenges which threaten our future These include climate change impact environmental deterioration increasing demand for energy and new approaches for alternative renewable energy sources which became a necessity for survival In addition to addressing the different environmental issues witnessed today research presented in this book stressed on the need of sustainably shaping buildings and cities using renewable energy sources Topics included in this book are 1 Resilience in the Built Environment 2 Design for energy efficient architecture and 3 Alternative and Renewable Energy Resources Quest in Architecture and Urbanism The book is of interest to researchers and academicians who continuously aim to update their knowledge in these fields as well as decision makers needing the enough knowledge to carry out the right decisions towards the benefit of the environment and society

Floods in a Megacity Ashraf Dewan,2013-03-01 Flooding is one of the most devastating natural hazards in the world Available records suggest that both flood frequency and severity are on the rise and this is likely to worsen in the context of climate change As population infrastructure and poverty grow rapidly in developing countries particularly in urban agglomerations of 10 million people or more floods could cause widespread devastation economic damage and loss of life Assessment of vulnerability and risk from naturally occurring phenomena is therefore imperative in order to achieve urban sustainability This book uses geospatial techniques to evaluate hazards risk and vulnerability at a metropolitan scale in a data scarce country An empirical study was performed using remote sensing GIS and census data This research offers a new approach to mapping population infrastructures and communities at risk which can greatly contribute to the deeper understanding of flood disasters in a rapidly expanding megacity Examples shown in this book are from Dhaka Megacity however the techniques and methods can easily be implemented in medium to large cities of similar characteristics The book is essential reading for hazard researchers geospatial scientists disaster management professionals geographers urban planners and social scientists Ashraf M Dewan is currently a Lecturer in the Department of Spatial Sciences at Curtin

Urban Development in Asia and Africa Yuji Murayama, Courage Kamusoko, Akio Yamashita, Ronald

C. Estoque, 2017-03-29 This book examines the urban growth trends and patterns of various rapidly growing metropolitan regions in developing Asian and African nations from the perspective of geography. State-of-the-art geospatial tools and techniques including geographic information system science and remote sensing were used to facilitate the analysis. In addition to the empirical results, the methodological approaches employed and discussed in this book showcase the potential of geospatial analysis e.g. land change modeling for improving our understanding of the trends and patterns of urban growth in Asia and Africa. Furthermore, given the complexity of the urban growth process across the world, issues raised in this book will contribute to the improvement of future geospatial analysis of urban growth in the developing regions. This book is written for researchers, academicians, practitioners, and graduate students. The inclusion of the origin and brief history of each of the selected metropolitan regions, including the analysis of their urban primacy, spatiotemporal patterns of urban land use changes, driving forces of urban development, and implications for future sustainable development, makes the book an important reference for various related studies. *Urban Metabolism and Climate Change* Rahul Bhadouria, Sachchidanand Tripathi, Pardeep Singh, P. K. Joshi, Rishikesh Singh, 2023-05-23 This book provides a basic understanding and state-of-the-art of urban metabolism. Urban centres are increasingly challenged by population increase and the resultant environmental concerns, including the urban sprawl and climate change. Different patterns of urbanization contribute to the changing climate via differences in their urban metabolism, represented by energy and matter. Urban metabolic studies in terms of energy and material inflows, outflows, and stocks can be associated with traditional evaluation techniques to help assess the magnitude and potential effects of a variety of environmental challenges the world is facing today. Urban centres are critical real-time observatories that indicate the impact anthropogenic activities have on global biogeochemical cycles. Urban processes have significant and lasting impacts on the global carbon budget. The technological and infrastructural advancements have fuelled an increase in urban inputs and outputs of material and energy. Therefore, more sustainable approaches need to be adopted in changing scenarios for urban planning, particularly for sustainable resource utilization and better waste management practices. The book emphasises on the sustainability in urban metabolism, sustainable urban planning, ecosystem services, and disaster resilience to provide an interdisciplinary understanding of urban metabolism. The book also identifies an urgent need to develop new methodological approaches for real-time and reliable evaluation of urban metabolism. **Endocrinology of Cardiovascular Function** Ellis R. Levin, Jerry L. Nadler, 1998-10-31 *Endocrinology of Cardiovascular Function* is a fitting inauguration to the Endocrine Update Series. The aim of these publications is to provide the clinician with cutting-edge yet succinct access to the latest advances in endocrinology. Historically, our understanding of hormonal disturbances was restricted to the classical secretory glands and their targets. As *Endocrinology of Cardiovascular Function* so aptly indicates, endocrinology is no longer constrained by our early physiologic understanding of glandular disorder. *Endocrinology of Cardiovascular Function* has set the standard of excellence for the future volumes in this series.

Shlomo Melmed M D Series Editor Endocrine Update Growth factors such as IGF 1 play important roles in cardiovascular cell hypertrophy and the response to acute vascular injury From another perspective traditional endocrine hormones such as estrogen have been found to participate in preventing the development of atherosclerosis in women acting through novel mechanisms on target vascular cells Other endocrine hormones such as PTHRP and adrenomedullin also modulate cardiovascular and renovascular dynamic states suggesting new roles for these peptides as vasodilators This multi authored text is dedicated to highlighting emerging and important new information regarding the endocrinology of the cardiovascular system Ellis R Levin M D
