strengthen the foundation of their career and produce knowledgeable Indian medical graduates. The book has been written according to the new changes made to the curriculum by the NMC. It will help fulfil the need of the students and adapt themselves to the changes easily as facing new changes is always a challenge for both students as well as teachers. Keeping the NMC's objective in mind, the author has made an effort to impart knowledge in a competency-based and ECE format. This book focuses on explaining the anatomical basis of various disorders in a question-answer format. When the 'why' is clear, the 'how' becomes easy to understand. And when the 'how' becomes easy, the management of a disease also becomes easy. This book will provide guidelines to preclinical students to prepare for clinical-based questions and, considering the vastness of the subject, it can be one of the best tools to revise clinical aspects of various systems of the human anatomy.
