Anatomy of the Reproductive System

Gross Anatomy of the Human Male Reproductive System

1. List the two principal functions of the testis. Sperm production
and testosterone production
2. Identify all indicated structures or portions of structures on the diagrammatic view of the male reproductive system below.

3. A common part of any physical examination of the male is palpation of the prostate. How is this accomplished?
(Think!) Through the anterior wall of the rectum.
4. How might enlargement of the prostate interfere with urination or the reproductive ability of the male?
Constriction of the urethra at that point may lead to nonpassage of urine or semen.
5. Why are the testes located in the scrotum rather than inside the ventral body cavity? Testes are located in the scrotum to provide a slightly cooler temperature necessary for sperm production.
